

Welcome to The International Conference on Nanophotonics 2010 in Tsukuba City
MAY 30– JUNE 3, 2010,EPOCAL TSUKUBA, TSUKUBA, JAPAN

Nanophotonics 2010 has been finished successfully.

A series of The International Conference on Nanophotonics is a topical conference sponsored by The Optical Society of America, held in China in the past three years (Hangzhou in 2007, Nanjing in 2008, Harbin in 2009). The Nanophotonics 2010 will take place on May 30 to June 3, 2010 at Tsukuba International Congress Center (EPOCAL TSUKUBA), Tsukuba, Japan, co-sponsored by Optical Society of Japan. Nanophotonics is a rapid growing and emerging multidisciplinary field that deals with optics/photonics on the nanoscale. The objective of this topical conference is to bring together international scientists and researchers interested in the recent developments in nanophotonics. The topics will include (1) nanophotonics for bio/energy/environment, (2) nanophotonics for information technology and (3) fabrication/characterization/modeling for nanophotonics, from materials science, device physics/chemistry to optic/photonic applications.

Sponsors and Supporters

Technical sponsors

- The Optical Society of America (OSA)
- Optical Society of Japan (OSJ)
- University of Tsukuba
- National Institute for Materials Science (NIMS)
- Optoelectronic Industry and Technology Development Association (OITDA)
- Peking University
- University of Dayton

Supporters

- Tsukuba City
- Support Center for Advanced Telecommunications Technology Research, Foundation
- Research Foundation for the Electrotechnology of Chubu
- TEPCO Research Foundation
- Foundation for Promotion of Material Science and Technology of Japan
- Nippon Sheet Glass Foundation for Materials Science and Engineering

Conference Topics

Nanophotonic material for bio/energy/environment

- Bio-molecular architecture
- Organic/inorganic solar cell
- Green nano-particle/composite
- Photo-catalysis physics/chemistry
- Nano-particle-assisted imaging
- Lab-on-a-chip photonics
- Nano-imaging/sensing
- Nano-material for lighting/display

Nanophotonic structure for information technology

- Near-field optics
- Surface plasmonics, optical nano-antenna
- Photonic crystal, silicon photonics
- Negative index material
- Quantum dot, nano-whisker
- Non-linear optics in nano-structure
- Integrated nano-device/circuit
- THz nano-photonics

Fabrication/characterization for nanophotonics

- Self-assembled growth/deposition
- Photo/chemical synthesis/deposition
- Nano-imprint, etching, deposition
- Laser/ion-beam writing/processing
- Scanning optical microscope-assisted process
- Nano-probe-assisted process/characterization
- Optical nano-manipulation/tool
- Modeling/diagnostics for nano-photonics

THE INTERNATIONAL CONFERENCE ON NANOPHOTONICS 2010

◎Best Poster Paper Awards

- T. Kishi, S. Furusawa, A. Yasumori, T. Yano and S. Shibata, "Solid Immersion Lens with Gold Nanoparticles for Localized Surface Plasmon Microscopy", Tokyo Institute of Technology, Japan
- Zhehai Zhou, Qiaofeng Tan and Guofan Jin, "Surface plasmon interference formed by tightly focused higher polarization order axially-symmetric polarized beams", Tsinghua University, China
- A. Llopis and A. Neogi, "Near-Field Mapping of the Huang-Rhys Parameter", University of North Texas, USA
- Y. Kajihara, K. Kosaka and S. Komiyama, "Passive near-field microscopy in long-wavelength infrared region", The University of Tokyo, Japan
- J. Grgić , S. Xiao, J. Mørk, A. P. Jauho and N. A. Mortensen, "Slow light enhanced absorption in hollow core fibre", Technical University of Denmark, Denmark
- Luojia Wang, Ying Gu, Xiaoyong Hu and Qihuang Gong, "Large field enhancement through permittivity-contrast in a planar MIM waveguide", Peking University, China
- Wei Ting Chen, Pin Chieh Wu, Chen Jung Chen, Yuan-Fong Chau, Chieh-Hsiung Kuan and Din Ping Tsai, "Electromagnetic Energy Vortex of Sub-wavelength Plasmonic Taiji Mark", National Taiwan University, Taiwan

◎Best Student Paper Awards

- C. C. Lee, "Ultra-short optical pulse generation with single layer graphene", University of Colorado, USA
- J. Ye, "Demonstration of strong localization of surface enhanced Raman scattering on individual symmetry-reduce metallic nanoparticles", Katholieke Universiteit Leuven, Belgium
- R. R. Yalla, "Single Quantum Dots on an Optical Nanofiber", University of Electro-Communications, Japan
- Y. Fujiwara, "Surface Plasmon Enhanced Photoluminescence on Biharmonic Gratings Structure", Osaka University, Japan

◎Conference Photographs

Conference Organization:

Conference Honorary Chairs:

- Paras N. Prasad (SUNY at Buffalo, USA)
- Toyohiko Yatagai (OSJ and Utsunomiya University, Japan)

Conference Co-chairs:

- Kiyoshi Asakawa (NIMS, Japan)
- Qihuang Gong (Peking University, China)
- Joseph W. Haus (University of Dayton, USA)

International Program Committee:

Chairs:

- Kazuaki Sakoda (NIMS, Japan)
- Qiwen Zhan (University of Dayton, USA)

Members:

- Katsuhiro Akimoto (University of Tsukuba, Japan)
- Yiping Cui (Southeast University, China)
- Didier Felbacq (University of Montpellier, France)
- John T. Fourkas (University of Maryland, USA)
- Guang S. He (SUNY at Buffalo, USA)
- Sailing He (Zhejiang University, China and KTH, Sweden)
- Ho Pui Ho (Chinese University of Hong Kong, China)
- Minghui Hong (National University of Singapore, Singapore)
- Chennupati Jagadish (ANU, Australia)
- Andrei V. Kabashin (Ecole Polytech. de Montréal, Canada)
- Takashi Kita (University of Kobe, Japan)
- Martin Kristensen (University of Aarhus, Denmark)
- L. (Kobus) Kuipers (FOM - Institute for AMOLF, Netherlands)
- James R. Leger (University of Minnesota, USA)
- Marko Loncar (Harvard University, USA)
- Xiangang Luo (Chinese Academy of Science, China)
- Hai Ming (University of Science and Technol. China, China)
- Hiroaki Misawa (University of Hokkaido, Japan)
- Hideki Miyazaki (NIMS, Japan)
- Susumu Noda (University of Kyoto, Japan)
- Marek Samoc (ANU, Australia)
- Vahid Sandoghdar (ETH, Switzerland)
- Vladimir Shalaev (Purdue University, USA)
- Concita Sibilia (Universita Roma, Italy)
- Yoshimasa Sugimoto (NIMS, Japan)
- Xiudong Sun (Harbin Institute of Technology, China)
- Lars Thylen (KTH, Sweden)
- Din Ping Tsai (National Taiwan University, Taiwan)
- Qiming Wang (Chinese Academy of Science, China)
- Jingjun Xu (Nankai University, China)
- Jiangeng Xue (University of Florida, USA)
- Guozheng Yang (CAS, China)
- Changhe Zhou (SIOFM - CAS, China)

Industry Exhibition

Canon Marketing Japan Inc.

Obudcat's Nano Imprint Lithography is designed for full area UV and thermal imprint to the entire substrate. The Obudcat Soft Press Technology®, which uses air pressure allows to imprint nano-pattern homogeneously. Moreover, IPS®, (Intermediate Polymer Stamp®) makes it possible to avoid contact between the master stamp and the hard substrate which will be the solution to mass production. This increases the stamp lifetime, and meanwhile enables contamination control by limiting the replication of contaminants to greatly improve process yield. Plus, STU®, (Simultaneous Thermal and UV®) realizes precise pattern imprint to substrate. Obudcat not only provides Nano Imprint Lithography, but also provides stamp manufacturing, anti-sticking coating process,STU®, resist which will be the solution to the entire process flow. These Obudcat's solution bring in the adoption of LED high volume manufacturing and also is expected to improve for the optical devices(lens, glass, film), large area imprint and so on.

JEOL Ltd.

「JEOL is a leading world supplier of analytical and electron optic instruments for science and advanced equipment for semiconductor, medical, and environmental industries.」

TOSHIBA MACHINE CO., LTD.

TOSHIBA MACHINE GROUP, the Home of Manufacturing Technologies from High-Precision to Large-Scale, is a total machine manufacturer that offers the variety of the products for the customer needs. Founded as a machine tool manufacturer in 1938, Toshiba Machine has since developed and produced a wide variety of product lines in response to the demands of the times. Now operating as the Toshiba Machine Group, the company is involved in the production and sale of diverse equipment including injection molding machines, die-casting machines, plastic extrusion machines, industrial robots, nanoimprint machines, high-precision machines, machine tools, and hydraulic equipment. Toshiba Machine entered the field of nanoimprint machines in 2004 to develop and manufacture press-type and roll-to-roll nanoimprint machines. In 2009 the high-precision machine business was consolidated with a new Nano Processing System Division launched to synergize nanoimprint lithography with ultraprecision machining. To realize device mass production with nanoimprint machines, it will be necessary not only to improve machine performance, but also to perfect the overall technology, including the mold, resin material, process design, and inspection required for implementing the entire manufacturing sequence. We are working tirelessly to develop these technologies as a total solution for our customers.

AET, Inc.

Ever since its establishment in 1988, AET has undertaken the role of pioneer in importing hardware and software products from top class vendors aiming to introduce the most advanced technology and specializing in electromagnetic technology.

CST (headquartered in Germany)'s electromagnetic simulation software, "CST STUDIO SUITE" has recorded the sale of over 1000 seats worldwide. Its customers include major electric makers, public research organizations and universities. The software has been accepted both in Japan and abroad as a specialist tool to solve a wide range of complex problems in electromagnetic fields. AET works as the exclusive Japanese distributor of CST, also provides online support, training services and engineering services, which result in increased customer satisfaction.

With highly technical knowledge, a broad network and ingenious ideas, AET constantly strives to propose the best solution for each customer, aiming to contribute to the progress of human society.

Rsoft Design Group Japan KK

RSoft Design Group is the worldwide leader in photonic design automation software, and serves several industries including optical communication, optoelectronics, and semiconductor manufacturing. Within optical communications, RSoft is the only company to provide a full range of design, optimization, and planning tools. Within the physical layer, RSoft provides the most extensive collection of award-winning design tools for passive and active optoelectronic components and subsystems.

Tomoe Engineering Co.Ltd.

Nanonics Imaging Ltd.

Company Name: Tomoe Engineering Co., Ltd. / Nanonics Imaging Ltd.

Tomoe Engineering who is Japanese distributor of Nanonics Imaging Ltd. in Israel, would like to introduce unique SPM/NSOM system made by Nanonics:

Product Key word:

Multiprobe SPM/NSOM/Confocal; Optometronic 4000 Photonic Workstation,

AFM/Raman/TERS;

AFM/SEM/FIB; Cryogenic NSOM/AFM/Raman

Product description:

Single/Multiprobe AFM/NSOM/SPM/Confocal Systems with transparent optical & electron/ion beam integration.

Multiprobe plasmonic, photonic, biological, electrical,

thermal characterization. On-line Raman/TERS, SEM, FIB, 10°K operation.

AFM/NSOM modes with Si or transparent fiber probes.

NanoTool Kit of optical, electric, thermal & nanochemical deposition probeswith deep trench/side wall imaging.

Multiprobe Photonic/Plasmonic Characterization System and new revolutionary Hydra optical BioAFM.

Coherent Japan, Inc.

We are one of the world's leading suppliers of photonics-based solutions to a broad range of commercial and scientific research customers. We design, manufacture and market lasers, laser-based systems, precision optics and related accessories for a diverse group of customers.

Coherent is the only company to offer a complete line of ultrafast products:

- Oscillators
- Amplifiers

- Pump Lasers
- OPAs
- OPOs
- Accessories

The common element of our ultrafast lasers and accessories is that their cutting-edge performance is easily accessible — even for users without expertise in lasers — and ultrastable from day to day. For every user, it's Better Ultrafast Every Day.

EIKO Corporation

EIKO supports innovative technology over ten years by advanced vacuum products. EIKO Corporation has been supplied our products for domestic and overseas research facilities since 1974. Recently, EIKO makes contributions to research and development of micro-machines, semi-conductor, display, photovoltaic system and etc. We will challenge for innovative technology by the rich harvest reaped from our users.

Spectra-Physics K.K.

For nearly 50 years, Spectra-Physics® has been an industry-leading global supplier of advanced laser solutions to the scientific research, life and health sciences, microelectronics, solar, semiconductor, and industrial manufacturing markets. Our portfolio of high performance, high reliability products includes a wide range of ultrafast, Q-switched DPSS, CW and quasi-CW, high-energy pulsed, tunable, gas, and fiber-based lasers.

■ Mai Tai SP --- Short Pulse Ultrafast Oscillator

Mai Tai® SP ultrafast laser is the ultimate short-pulse oscillator with an unprecedented level of automation and long-term environmental stability. Designed for seeding ultrafast amplifiers, the Mai Tai SP laser is capable of producing a broad range of output bandwidths: 60 nm to 10 nm, corresponding to near transform-limited pulse widths from <25 fs to 100 fs. The bandwidth is user-adjustable via the Mai Tai SP graphical user interface (GUI). This unique feature allows for seeding sub-35 fs, 120 fs, and 2 ps amplifier systems using the same seed laser without manual realignment. Also adjustable via the GUI is the center wavelength from 780 to 820 nm.

CORNES DODWELL LTD.

CORNES DODWELL is constantly seeking innovative products and advanced technologies to introduce to the Japanese market in response to the needs of business and industry.

With a network of international partners that extends across the globe, CORNES DODWELL is able to bring to the attention of its customers the very best that the world has to offer.

In an era characterized by rapid change and advances in knowledge, CORNES DODWELL prides itself on a proven ability to respond swiftly, flexibly and successfully to the diverse requirements and demands of the modern business world.

CORNES DODWELL not only continues to work in support of Japan's economic growth but also to promote the development of friendly relationships and cultural exchanges between Japan and other countries.

CORNES DODWELL is also committed to the concept of corporate social responsibility (CSR) and to the adoption and strict application of policies designed to preserve and protect the environment.

[Shimadzu Corporation](#)

Shimadzu

— Thinking Globally

Shimadzu Corporation has been involved in activities at research institutes and in cutting-edge industrial fields throughout the world for many years. This global perspective is essential in many fields. For instance, in the environmental field, addressing problems at a global level is now indispensable, and in front-line medical fields, much research is now being pursued through international networks. In the industrial equipment fields of semiconductors and flat panel displays (FPDs), from development to production and distribution, international borders have effectively disappeared. In order to more precisely fulfill the demands of our customers, Shimadzu is striving to enrich our corporate activities by thinking globally. We are cultivating product development, production, and service bases all over the world as we work to provide our world-wide customer base with superior products and services. Shimadzu continues in its quest to become a corporation that is trusted on a global scale by people everywhere, in every global arena.

[Cybernet Systems Co., Ltd.](#)

CYBERNET SYSTEMS has provided advanced technologies and services in the areas of scientific engineering calculation and product development for over 30 years. Our CAE solutions provide a variety of analysis capabilities, including stress, heat, vibration and noise analysis for structures and mechanical products, control analysis for mechanical and telecommunications devices, optics design for optical lens and LED products, and electronic analysis for printed circuit boards.

As our optical software, we provide “Optiwave”, “Poynting for Optics”, “LightTools”, “setfos” and more. “Optiwave” and “Poynting” for Optics provide design and simulation environment of opto-electronic circuits and optical communications. “Light Tools” and “setfos” provide very powerful optical solutions for kinds of Flat Panel Display, Light Source, Solar cell and materials.

[Elionix Inc.](#)

ELIONIX.Inc was established in 1974, 35 years ago, and has been oriented to Nanotechnology products. The company name “ELIONIX” comes from Electron, Ion and X-ray which are the technology equipped with our systems and have been continuously developed in our history. All of our products are designed for the ultra fine field and “One and Only” features, such as the 4nm pattern wiring by Electron Beam Lithography system, 3D measurement function by SEM or etc. These systems offer users opportunities to create new directions in their successful researches.

Regarding our Electron Beam Lithography systems, we have been continuously improving their performance since company establishment. Recently, we have released a new Electron Beam Lithography “ELS-F125”, which has 125 kV acceleration voltage, and has achieved 4nm line writing and very fine and uniform pattern in an entire large field with high beam current. This system is our landmark of “One and Only” policy and we intend to continue this policy of our performance.

Nanophoton Corporation

Nanophoton is an Osaka University's venture company established in February 2003 by people from diverse fields including science, engineering and managements. The specialty and skills brought by each person are different but we share the same dream, "Leading edge microscopes from Nanophoton!" Nanophoton is manufacturing new products to meet demands of the world by monitoring and responding to world trends. All members of Nanophoton aspire to open up leading edge technologies and to contribute to society through nanotechnologies and photonics applied products. Based on our philosophy to produce and market the world's best microscope, we have launched laser Raman microscope RAMAN-11. It is a world first laser Raman microscope realizing fast observation of high definition Raman imaging. It enables anyone to easily obtain the high quality Raman imaging in a short time due to the development of our original optical scanning method.

Cambridge University Press Japan

Cambridge University Press is the publishing business of the University of Cambridge, one of the world's leading research institutions. It is the oldest publisher and printer in the world, having been operating continuously since 1584. We aim to further, through publication and printing, the University of Cambridge's own objective of advancing learning, knowledge and research worldwide. With branches, offices and agents throughout the world, we are able to draw on a remarkable range of authors (currently around 40,000 from over 100 different countries) and to market and distribute material to readers everywhere. For further information, please see <http://www.cambridge.org/>

Speakers and tentative titles

Key Note Speaker

- M. Ohtsu (University of Tokyo, Japan), "Nanophotonics: Dressed photon technology for innovative devices, fabrications and systems"
- P. N. Prasad (State University of New York at Buffalo, USA), "Nanophotonics: Nanoscale control of Excitation Dynamics for New Applications in Healthcare and Energy"

Plenary Speakers

- F. Capasso (Harvard University, USA), "Subwavelength photonics: from light manipulation to quantum levitation at the nanoscale"
- S. Y. Chou (Princeton University, USA), "Subwavelength Photonics and Nanoimprint Technology – A Unique Path to Engineering New Optical Materials and Devices"
- J. T. Fourkas (University of Maryland, USA), "Achieving super-resolution in photolithography"
- T. F. Krauss (University of St. Andrews, UK), "Dispersion-engineered photonic crystal waveguides for enhanced light-matter interaction"
- C. Sibilia (Universita' degli Studi di Roma La Sapienza, Italy), "Nanoscale Nonlinear Optics"

Invited Speakers

- H. Chen (Tongji University, China), "Optical metamaterials based on multilayer dielectric structures"
- H. V. Demir (Bilkent University, Turkey), "Green nanophotonics to combat climate change"
- L. Han (National Institute for Materials Science, Japan), "Dye-sensitized Solar Cells with Nanotechnologies"
- Y. Harada (Kobe University, Japan), "Emission properties of excitons strongly localized to nitrogen pairs in GaAs"
- R. Heintzmann (King's college, UK), "Structured Illumination and Image Inversion Interferometry"
- C. Jagadish (The Australia National University, Australia), "III-V Semiconductor Nanowires for Optoelectronics Applications"
- A. V. Kabashin (Université de Méditerranée, France), "Nanoplasmonics for Biosensing"
- D. S. Kim (Seoul National University, South Korea), "Active Terahertz Nanoresonators"
- Y. Li (Peking University, China), "Dielectric-loaded surface plasmon-polariton nanowaveguides fabricated by two-photon polymerization"
- S. Y. Lin (Rensselaer Polytechnique Institute, USA), "Architectural nanophotonics and its impact on energy conversion"
- M. Lippitz (Max-Planck-Institite for Solid State Research, Germany), "Single nanoparticle detection with high-Q whispering gallery resonatorUltrafast spectroscopy of single plasmonic nanostructures: Nanoantennas for quantum emitters and nanomechanics"
- O. J. F. Martin (Swiss Federal Institute of Technology Lausanne (EPFL), Switzerland), "Controlling light at the nanoscale with plasmonic antennas: applications for sensing and trapping"
- S. Matsui (University of Hyogo, Japan), "Room-temperature nanoimprint using HSQ and its applications"
- H. Misawa (Hokkaido University, Japan), "Photochemistry on Nanoengineered Gold Structures"
- N. Murase (National Institute of Advanced Industrial Science and Technology, Japan), "Assembled quantum dots in silica glass with bright photoluminescence"
- T. Nagao (National Institute for Materials Science, Japan), "Low-dimensional plasmons in metallic atom sheets, atom chains and nano-sheets"
- S. Noda (University of Kyoto, Japan), "Recent Progress of Manipulation of photons by photonic crystals"

- K. Ohkawa (Tokyo University of Science, Japan), "H₂ evolution from water by GaN photocatalyst"
- D. van Oosten (FOM Institute AMOLF, Netherland), "The electro-magnetic nature of light at the nanoscale"
- R. Quidant (ICFO-Institut de Ciencies Fotoniques, Spain), "Plasmon Nano-optics: Harnessing light and heat at the nanoscale for Biosciences"
- Y. Sakakibara (National Institute of Advanced Industrial Science and Technology, Japan), "Carbon Nanotube Nonlinear Photonics"
- X. Sun (Harbin Institute of Technology, China), "Coherent control of spontaneous emission of multi-level atom in artificial micro-nanostructured system"
- Y. Tachibana (University of Osaka, Japan), "Development of semiconductor quantum dot sensitized solar cells by controlling interfacial electron transfer kinetics"
- H. K. Tsang (Chinese University of Hong Kong, China), "Silicon nanophotonic waveguide devices"
- Y. Uehara (University of Tohoku, Japan), "Phonon detection using scanning tunneling microscope light emission spectroscopy"
- Y. Xiao (Peking University, China), "Single nanoparticle detection with high-Q whispering gallery resonator"
- J. Xue (University of Florida, USA), "Hybrid Photovoltaic Cells based Conjugated Polymers and CdSe Nanoparticles"
- S. Yagi (The University of Tokyo, Japan), "Recent progress on high-efficiency quantum dot solar cells"
- K. Yong (Pohang University of Science and Technology, South Korea), "Fabrication of heterostructured ZnO nanowires and applications: photochemical energy conversion and wettability"
- Q. Zhan (University of Dayton, USA), "Spiral plasmonic lens as a miniature circular polarization analyzer"
- L. Zhou (Fudan University, China), "Fractal plasmonic metamaterials for subwavelength imaging and perfect absorbing"
- X. Zhu (Peking University, China), "Characterization of Plasmonic Nanostructures by Using Scanning Near-field Optical Microscopy"

Conference Topics:

• Nanophotonic material for bio/energy/environment

- Bio-molecular architecture
- Organic/inorganic solar cell
- Green nano-particle/composite
- Photo-catalysis physics/chemistry
- Nano-particle-assisted imaging
- Lab-on-a-chip photonics
- Nano-imaging/sensing
- Nano-material for lighting/display

• Nanophotonic structure for information technology

- Near-field optics
- Surface plasmonics, optical nano-antenna
- Photonic crystal, silicon photonics
- Negative index material
- Quantum dot, nano-whisker
- Non-linear optics in nano-structure
- Integrated nano-device/circuit
- THz nano-photonics

• Fabrication/characterization for nanophotonics

- Self-assembled growth/deposition
- Photo/chemical synthesis/deposition
- Nano-imprint, etching, deposition
- Laser/ion-beam writing/processing
- Scanning optical microscope-assisted process
- Nano-probe-assisted process/characterization
- Optical nano-manipulation/tool
- Modeling/diagnostics for nano-photonics

Important Dates:

Abstract submission deadline: January 31, 2010

Abstract acceptance date: March 10, 2010

Pre-registration deadline: April 30, 2010

Publications:

Selected submissions will be published in the Journal of Nonlinear Optical Physics and Materials (JONPM). JONPM is an international journals in English and are indexed by both SCI and EI.

- Nano-material for lighting/display

• Nanophotonic structure for information technology

- Near-field optics
- Surface plasmonics, optical nano-antenna
- Photonic crystal, silicon photonics
- Negative index material
- Quantum dot, nano-whisker
- Non-linear optics in nano-structure
- Integrated nano-device/circuit
- THz nano-photonics

• Fabrication/characterization for nano-photonics

- Self-assembled growth/deposition
- Photo/chemical synthesis/deposition
- Nano-imprint, etching, deposition
- Laser/ion-beam writing/processing
- Scanning optical microscope-assisted process
- Nano-probe-assisted process/characterization
- Optical nano-manipulation/tool
- Modeling/diagnostics for nano-photonics

Important Dates:

Summary submission deadline: February 15, 2010

Summary acceptance date: March 10, 2010

Pre-registration deadline: April 30, 2010

Publications:

Selected submissions will be published in the Journal of Nonlinear Optical Physics and Materials (JONPM) JONPM is an international journals in English and are indexed by both SCI and EI.

For tentative titles of speakers, please visit <http://www.nims.go.jp/nanophoto2010/>

PROGRAM AT A GLANCE

	Sun 30 May	Mon 31 May	Tues 1 June	Wed 2 June	Thurs 3 June			
8:30	8:40 9:00 9:30 10:00 10:30 11:00 11:30 12:00 12:30 13:00	Registration 8:00-8:40	8:30	W-Opening Lectures		Th-A-1 THz/ Metamaterials		
9:00		Opening Remarks	Tu-Opening Lectures		Plenary Lecture 4			
9:30		M-Opening Lectures	Plenary Lecture 2		Plenary Lecture 5			
10:00		Keynote Lecture 1	Plenary Lecture 3		Plenary Lecture 5			
10:30		Coffee break	Coffee break		Coffee break			
11:00		Keynote Lecture 2	Tu-A-1 Photonic Crystals/ Quantum Dots	Tu-A-2 Green Nanomaterials	W-A-1 Plasmon Resonance/ SERS	W-A-2 Nano- characterization		
11:30		Plenary Lecture 1					Th-A-2 Metamaterials	
12:00							Th-A-4 Solar Cells 2	
12:30							Closing Remarks 12:15-12:40	
13:00		Lunch		Lunch		Lunch		
13:30	13:30 14:00 14:30 14:45 15:00 15:30 16:00 16:30 17:00 17:30 18:00 18:30 19:00 19:30 20:00 20:30	M-P-1 Nanogrowth- fabrication 1	M-P-3 Materials for High-efficiency Nanophotonics 1	Tu-P-1 Plasmon Propagation/ Plasmonic Array 1	Tu-P-3 Nanosensing/ Biosensing 1	W-P-1 Plasmonic Nanoantenna and Nanowaveguide	W-P-2 Optical Control/ Plasmon Control	~ 13:10 13:30 15:45 16:15 17:45 18:30 20:30
14:00		Coffee break		Coffee break				
14:30								
14:45		M-P-2 Nanogrowth- fabrication 2	M-P-4 Materials for High-efficiency Nanophotonics 2	Tu-P-2 Plasmon Propagation/ Plasmonic Array 2	Tu-P-4 Nanosensing/ Biosensing 2			
15:00		Registration 15:00-18:00						
15:30								
16:00					Coffee break			
16:30		Coffee break		Coffee break				
17:00		M-P-5 Poster Session A 16:30-18:00	M-P-6 Tutorial Course 1	Tu-P-5 Poster Session B 16:30-18:00	Tu-P-6 Tutorial Course 2	W-P-3 Integrated Nanophotonics	W-P-4 SNOM Technology	
17:30								
18:00								
18:30	Reception 17:00-19:30							
19:00		Rooms open until 20:00		Rooms open until 20:00				
19:30								
20:00								
20:30								

Optional Tour
13:10-17:30
(Lunch in the bus)
Crystal glass
factory
Beer factory

~ 17:30

17:45

20:30

DETAILD PROGRAM

Monday, May 31, 2010		
Room : 3F 300 (Convention Hall)		
08:40-09:00	Opening Remarks <i>Chair : Kazuaki Sakoda</i>	
08:40-08:50	Welcome Address <u>Kiyoshi Asakawa</u> , Conference Co-chair	
08:50-09:00	<u>Tetsuji Noda</u> , Vice President of National Institute for Materials Science	
09:00-12:15	Monday-Opening Lectures <i>Chair : Joseph W. Haus and Qihuang Gong</i>	
09:00-10:00	Keynote Lecture 1 KN-1 Nanophotonics: Dressed photon technology for innovative devices, fabrications, and systems <u>M. Ohtsu</u> <i>The University of Tokyo, Japan</i>	- 1 -
10:00-10:30	Coffee Break	
10:30-11:30	Keynote Lecture 2 KN-2 Nanophotonics: Nanoscale Control of Excitation Dynamics for New Applications in Healthcare and Energy <u>Paras N. Prasad</u> <i>The State University of New York at Buffalo, USA</i>	- 2 -
11:30-12:15	Plenary Lecture 1 PL-1 Subwavelength Photonics and Nanoimprint Technology – A Unique Path to Engineering New Optical Materials and Devices <u>Stephen Y. Chou</u> <i>Princeton University, USA</i>	- 3 -
12:15-13:30	Lunch	
	Room : 3F 300 (Convention Hall)	Room : 1F 102
13:30-14:30	M-P-1 : Nanogrowth-fabrication 1 <i>Chair : Stephen Y. Chou</i>	M-P-3 : Materials for High-efficiency Nanophotonics 1 <i>Chair : Yukihiro Harada</i>
13:30-14:00	IN-01 III-V Semiconductor Nanowires for Optoelectronics Applications <u>C. Jagadish</u> <i>The Australian National University, Australia</i>	IN-03 Recent progress on high-efficiency quantum dot solar cells <u>Shuhei Yagi and Yoshitaka Okada</u> <i>Saitama University, Japan</i>
14:00-14:30	IN-02 Room-temperature nanoimprint using HSQ and its application <u>Shinji Matsui</u> <i>University of Hyogo, Japan</i>	IN-04 Assembled quantum dots in silica glass with bright photoluminescence <u>N. Murase</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i>
14:30-14:45	Coffee Break	
14:45-16:15	M-P-2 : Nanogrowth-fabrication 2 <i>Chair : Chennupati Jagadish and Shinji Matsui</i>	M-P-4 : Materials for High-efficiency Nanophotonics 2 <i>Chair : Hilmi Volkan Demir and Shuhei Yagi</i>
14:45-15:00	O-01 Imprint-Mold-Cleaning by Vacuum Ultraviolet Light <u>M. Nakao, M. Yamaguchi and S. Yabu</u> <i>National Institute of Information and Communications Technology, Japan</i>	O-07 Nanochain and nanosphere through organosilane mediated gold nanoparticles assembly <u>M. Khorasaninejad and S. S. Saini</u> <i>University of Waterloo, Canada</i>
15:00-15:15	O-02 Wafer-Scale Highly Ordered Porous Alumina on Substrates <u>T. S. Kustandi, W. W. Loh, H. Gao and H. Y. Low</u> <i>Agency for Science, Technology and Research (A*STAR), Singapore</i>	O-08 Optical property of erbium/bismuth co-doped zeolites <u>Zhenhua Bai, Hong-Tao Sun, Takashi Hasegawa, Minoru Fujii, Fumiaki Shimaoka, Yuji Miwa, Minoru Mizuhata and Shinji Hayashi</u> <i>Kobe University, Japan</i>
15:15-15:30	O-03 Formation of reversible micro-structures in lithium niobate by femtosecond direct laser writing technique <u>V. Mizeikis, W. Inami and Y. Kawata</u> <i>Shizuoka University, Japan</i>	O-09 Characters of MgX (X = Te, Se, S and O) clusters: conformations, bonding characters, absorption spectra and Orbitals <u>Shuhong Xu, Chunlei Wang, Yiping Cui</u> <i>Southeast University, China</i>
15:30-15:45	O-04 Surface Patterning using Gold and Dielectric Nanoparticles Excited by Femtosecond Laser <u>M. Terakawa and M. Obara</u> <i>Keio University, Japan</i>	O-10 On magnetooptical properties of the plasmonic heterostructures <u>V. I. Belotelov, A. N. Kalish, V. A. Kotov, A. K. Zvezdin, I. A. Akimov and M. Bayer</u> <i>M.V. Lomonosov Moscow State University, Russia</i>
		- 49 -

	Room : 3F 300 (Convention Hall)	Room : 1F 102
15:45-16:00	O-05 A CAD-integrated Approach for Micro Manufacturing with the Two-photon Polymerization Technique <u>Chih-Lang Lin</u> , Chin-Te Lin, Chao-Yaung Liao, Yue-Lun Yang, Patrice L. Baldeck and Tien-Tung Chung <i>National Taiwan University, Taiwan</i>	O-11 Ultra-short optical pulse generation with single layer graphene <u>C. C. Lee</u> , G. Acosta, J. S. Bunch and T. R. Schibli <i>University of Colorado, USA</i> - 44 -
16:00-16:15	O-06 Fabrication of the Optical Fiber Incorporated with Zinc Oxide Nano-particles and its Optical Nonlinearity <u>Seongmin Ju</u> , Pramod R. Watekar, Seongmook Jeong, Youngwoong Kim and Won-Taek Han <i>Gwangju Institute of Science and Technology, Korea</i>	O-12 Reliability Study of InGaN/GaN MQWs LEDs with different growth parameters <u>K. K. Leung</u> , W. K. Fong and C. Surya <i>The Hong Kong Polytechnic University, China</i> - 45 -
16:15-16:30	Coffee Break	
	Room : 3F 303, 304	Room : 1F 102
16:30-18:00	M-P-5 : Poster Session A	M-P-6 : Tutorial Course A
16:30-18:00	P-A01 ~ P-A90 - 101 ~ 189 - Room: open till 20:00	TU-1 Nanophotonics <u>Joseph W. Haus</u> and <u>Qiwen Zhan</u> <i>University of Dayton, USA</i>

Tuesday, June 1, 2010		
	Room : 3F 300 (Convention Hall)	
08:30-10:00	Tuesday-Opening Lectures Chair : Qiwen Zhan and Susumu Noda	
08:30-09:15	Plenary Lecture 2 PL-2 Sub-wavelength Photonics: from light manipulation to quantum levitation at the nanoscale <u>Federico Capasso</u> <i>Harvard University, USA</i>	- 4 -
09:15-10:00	Plenary Lecture 3 PL-3 Dispersion-engineered photonic crystal waveguides for enhanced light-matter interaction <u>Thomas F. Krauss</u> <i>University of St Andrews, UK</i>	- 5 -
10:00-10:30	Coffee Break	
	Room : 3F 300 (Convention Hall)	Room : 1F 102
10:30-12:15	Tu-A-1 : Photonic Crystals / Quantum Dots Chair : Thomas F. Krauss and Shawn-Yu Lin	Tu-A-2 : Green Nanomaterials Chair : Arup Neogi and Masayuki Futamata
10:30-11:00	IN-05 Recent Progress of Manipulation of Photons by Photonic Crystals <u>S. Noda</u> <i>Kyoto University, Japan</i>	IN-07 H ₂ evolution from water by GaN photocatalyst <u>Kazuhiro Ohkawa</u> <i>Tokyo University of Science, Japan</i>
11:00-11:30	IN-06 Emission properties of excitons strongly localized to nitrogen pairs in GaAs <u>Yukihiro Harada</u> and Takashi Kita <i>Kobe University, Japan</i>	IN-08 Green nanophotonics to combat climate change <u>H. V. Demir</u> <i>Bilkent University, Turkey</i>
11:30-11:45	O-13 Angular emission pattern of photonic crystal micro-cavities <u>M. Abbarchi, F. Intonti, F. Riboli, S. Vignolini, A. Vinattieri, L. Balet, L. H. Li, A. Gerardino, M. Francardi, A. Fiore and M. Gurioli</u> <i>National Institute for Materials Science, Japan</i>	O-16 Promotion of methane steam reforming under spectrally controlled irradiated thermal radiation <u>Y. Maegami, F. Iguchi and H. Yugami</u> <i>Tohoku University, Japan</i>
11:45-12:00	O-14 Room temperature lasing behaviour at 1.55 μm on high quality factor (Q>55000) InP-based photonic crystal microcavities with quantum wires <u>L. J. Martínez, B. Alén, I. Prieto, D. Fuster, Y. González, L. González, M. L. Dotor, L. E. Muñoz, M. Kaldirim and P. A. Postigo</u> <i>Instituto de Microelectrónica de Madrid (IMM-CNM-CSIC), Spain</i>	O-17 Direct Nano-Bio Energy Transfer in Novel Biosensing Electrodes <u>M. Griep, C. Friedrich and S. Karna</u> <i>U. S. Army Research Laboratory, USA</i>
12:00-12:15	O-15 Plasmonic Waveguiding in Nano-metallic-wire-filled Photonic Crystal Fiber Taper <u>Z. X. Zhang, M. L. Hu, K. T. Chan and Q. Y. Wang</u> <i>The Chinese University of Hong Kong, China</i>	O-18 High Efficiency Light Emitters and Receivers using Nanostructure- controlled Surface Plasmon Coupling <u>K. Okamoto, R. Bardoux and Y. Kawakami</u> <i>Kyoto University, Japan</i>
12:15-13:30	Lunch	
	Room : 3F 300 (Convention Hall)	Room : 1F 102
13:30-14:30	Tu-P-1 : Plasmon Propagation / Plasmonic Array 1 Chair : Hiroaki Misawa	Tu-P-3 : Nanosensing / Biosensing 1 Chair : Norio Murase
13:30-14:00	IN-09 Architectural nanophotonics and its impact on energy conversion <u>S. Y. Lin and M.-L. Hsieh</u> <i>Rensselaer Polytechnic Institute, USA</i>	IN-11 Single nanoparticle detection with high-Q whispering gallery resonator <u>Yun-Feng Xiao</u> <i>Peking University, China</i>
14:00-14:30	IN-10 Low-dimensional plasmons in metallic atom sheets, atom chains and nano-sheets <u>T. Nagao, G. Han, C. Kubber, S. Yaginuma, C. Liu, C. Hoang, A. Pucci, D. Sanchez-Portal, S. Silkin, T. Inaoka</u> <i>National Institute for Materials Science, Japan</i>	IN-12 Nanoplasmonics for Biosensing <u>A. V. Kabashin</u> <i>Université de Méditerranée, France</i>
14:30-14:45	Coffee Break	

	Room : 3F 300 (Convention Hall)	Room : 1F 102
14:45-16:15	Tu-P-2 : Plasmon Propagation / Plasmonic Array 2 Chair : Oliver J. F. Martin and Hideki Miyazaki	Tu-P-4 : Nanosensing / Biosensing 2 Chair : Yun-Feng Xiao and Andrei V. Kabashin
14:45-15:00	O-19 Directional and Polarization Properties of a Plasmonic Cross Nanoantenna <u>Dinesh Kumar V.</u> <i>Indian Institute of Information Technology Design and Manufacturing, India</i>	O-25 SERS performance of silver nanoparticle patterns by masked ion-exchange process <u>Ya Chen</u> , Janne Jaakola, Antti Säynätjoki, Ari Tervonen and Seppo Honkanen <i>Aalto University, Finland</i>
	- 58 -	- 64 -
15:00-15:15	O-20 Plasmonic filters for snapshot infrared multispectral imaging <u>G. Vincent</u> , S. Collin, R. Haidar , S. Rommeluere, N. Bardou and J.-L. Pelouard <i>The French aerospace lab, France</i>	O-26 Intracellular pH Sensing in Cells Using Fluorescence Lifetime Imaging of Fluorescent Proteins <u>T. Nakabayashi</u> , S. Oshita, R. Sumikawa, F. Sun, M. Kinjo and N. Ohta <i>Hokkaido University, Japan</i>
	- 59 -	- 65 -
15:15-15:30	O-21 Comparisons of Surface Plasmon Sensitivities in Gold Nanostructures Using a Multispectral Analysis <u>Kuang-Li Lee</u> and Pei-Kuen Wei <i>Research Center for Applied Sciences, Academia Sinica, Taiwan</i>	O-27 SERS-based aqueous immunoassay realized with immune silica nanoparticles <u>C. Y. Song</u> , Z. Y. Wang, J. Yang, R. H. Zhang, H. Wu and Y. P. Cui <i>Southeast University, China</i>
	- 60 -	- 66 -
15:30-15:45	O-22 Super-Periodic Nanohole Array for Integrated Surface Plasmon Resonance Sensor Junpeng Guo, Hai Sheng Leong, Boyang Zhang, Yongbin Lin, Robert G. Lindquist and David J. Brady <i>University of Alabama in Huntsville, USA</i>	O-28 Optical Assessment of the Intracellular "Nano" Organelles —The Mitochondria in Health and Disease <u>A. Mayevsky</u> <i>Bar-Ilan University, Israel</i>
	- 61 -	- 67 -
15:45-16:00	O-23 Polarization-Analyzing Image Sensor in 65nm CMOS Process <u>S. Shishido</u> , T. Noda, K. Sasagawa, T. Tokuda and J. Ohta <i>Nara Institute of Science and Technology, Japan</i>	O-29 Fabrication of Au nanorings and their application to image quality improvement through localized surface plasmon resonance in optical coherence tomography <u>Hung-Yu Tseng</u> , Cheng-Kuang Lee, Shou-Yen Wu, Ting-Ta Chi, Kai-Min Yang, Jyh-Yang Wang, Yean-Woei Kiang, C. C. Yang and Meng-Tsan Tsai <i>National Taiwan University, Taiwan</i>
	- 62 -	- 68 -
16:00-16:15	O-24 Strong non-resonant photoluminescence enhancement in InGaN/GaN quantum wells with embedded Au nanocrystals A. A. Krokhin, A. Llopis, J. Lin, S. M. S. Pereira, T. Trindade, M. A. Martins, I. M. Watson and A. Neogi <i>University of North Texas, USA</i>	O-30 Optical Properties of ZnO Nanoparticles Capped by Polyethylene Glycol S. Tachikawa, A. Noguchi, M. Hara, O. Odawara and H. Wada <i>Tokyo Institute of Technology, Japan</i>
	- 63 -	- 69 -
16:15-16:30	Coffee Break	
	Room : 3F 303, 304	Room : 1F 102
16:30-18:00	Tu-P-5 : Poster Session B	Tu-P-6 : Tutorial Course B
16:30-18:00	P-B01 ~ P-B90 - 190 ~ 278 - Room: open till 20:00	TU-2 Nanostructures for Photovoltaics <u>Jiangeng Xue</u> <i>University of Florida, USA</i>

Wednesday, June 2, 2010		
	Room : 3F 300 (Convention Hall)	
08:30-10:00	Wednesday-Opening Lectures Chair : Kazuaki Sakoda and Yiping Cui	
08:30-09:15	Plenary Lecture 4 PL-4 Nanoscale Nonlinear Optics <u>C.Sibilia</u> , A. Benedetti, A. Belardini, M.Centini, MC Larciprete, M.Bertolotti <i>Universita' degli Studi di Roma La Sapienza, Italy</i>	
09:15-10:00	Plenary Lecture 5 PL-5 Achieving super-resolution in photolithography <u>J. T. Fourkas</u> , L. Li, M. Stocker, R. R. Gattass, E. Gershoren and H. Hwang <i>University of Maryland, USA</i>	- 6 -
10:00-10:30	Coffee Break	
	Room : 3F 300 (Convention Hall)	Room : 1F 102
10:30-12:15	W-A-1 : Plasmon Resonance / SERS Chair : Xiudong Sun and Tadaaki Nagao	W-A-2 : Nanocharacterization Chair : John T. Fourkas and Xing Zhu
10:30-11:00	IN-13 Plasmon Nano-optics: Harnessing Light and Heat at the Nanoscale for Biosciences <u>R. Quidant</u> <i>ICFO-Institut de Ciencies Fotoniques, Spain</i>	IN-15 Structured Illumination and Image Inversion Interferometry <u>K. Wicker, M. Walde, E. R. Oldewurtel, S. Boehme, L. Hirvonen, O. Mandula, S. Sindbert, G.U. Nienhaus and R. Heintzmann</u> <i>King's College London, UK</i>
11:00-11:30	IN-14 Photochemistry on Nanoengineered Gold Structures <u>H. Misawa, K. Ueno, Y. Nishijima and Y. Yokota</u> <i>Hokkaido University, Japan</i>	IN-16 Phonon detection using scanning tunneling microscope light emission spectroscopy <u>Y. Uehara</u> <i>Tohoku University, Japan</i>
11:30-11:45	O-31 Closely adjacent Ag nanoparticles formed by cationic dyes yielding enormous SERS activity <u>M. Futamata, Y. Yu, T. Yanatori and T. Kokubun</u> <i>Saitama University, Japan</i>	O-34 Imaging of plasmon wavefunctions using scanning near-field optical microscope <u>K. Imura and H. Okamoto</u> <i>Waseda University, Japan</i>
11:45-12:00	O-32 Demonstration of strong localization of surface enhanced Raman scattering on individual symmetry-reduce metallic nanoparticles <u>J. Ye, C. Chen, L. Lagae, G. Maes, G. Borghs and P. Van Dorpe</u> <i>IMEC, Belgium</i>	O-35 Surface plasmon enhancement of coherent phonons in an ion-implanted graphite <u>I. Katayama, S. Koga, J. Takeda, T. Shimada, S. Hishita, D. Fujita and M. Kitajima</u> <i>Yokohama National University, Japan</i>
12:00-12:15	O-33 Surface enhanced Raman scattering spectra affected by the refractive index of media around single Ag nanoparticle dimmers <u>Tamitake Itoh, Ken-ichi Yoshida, Asudevanpillai Biju, Mitsuru Ishikawa and Yukihiro Ozaki</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	O-36 Near-Field CARS with Nanosphere <u>C. H. Raymond Ooi</u> <i>University of Malaya, Malaysia</i>
12:15-13:30	Lunch	
	Room : 3F 300 (Convention Hall)	Room : 1F 102
13:30-15:45	W-P-1 : Plasmonic Nanoantenna and Nanowaveguide Chair : Markus Lippitz and Hon Ki Tsang	W-P-2 : Optical Control / Plasmon Control Chair : Arkadii Krokhin and Koichi Okamoto
13:30-14:00	IN-17 Controlling light at the nanoscale with plasmonic antennas: applications for sensing and trapping <u>Olivier J. F. Martin</u> <i>Swiss Federal Institute of Technology Lausanne (EPFL), Switzerland</i>	IN-19 Spiral plasmonic lens as a miniature circular polarization analyzer <u>Weibin Chen, Zhi Wu, Don C. Abeysinghe, Robert L. Nelson and Qiwen Zhan</u> <i>University of Dayton, USA</i>
14:00-14:30	IN-18 Dielectric-loaded surface plasmon-polariton nanowaveguides fabricated by two-photon polymerization <u>Yan Li, Zhaopei Liu, Haibo Cui, Hao Luo, Hong Yang, Qihuang Gong</u> <i>Peking University, China</i>	IN-20 Coherent control of spontaneous emission of multi-level atom in artificial micro-nanostructured system <u>Xiudong Sun, Bing Zhang, and Xiangqian Jiang</u> <i>Harbin Institute of Technology, China</i>
14:30-14:45	O-37 Surface Plasmon Polariton Enhancement in Ag Nanowire-Nanoantenna Optical Circuits <u>Zhe-yu Fang, Chen-fang Lin, Shan Huang and Xing Zhu</u> <i>Peking University, China</i>	O-42 Wavefront Control Using Spatially Modulated Aperture Arrays in Metal Films <u>L. Lin, X. M. Goh and A. Roberts</u> <i>University of Melborn, Australia</i>

	Room : 3F 300 (Convention Hall)	Room : 1F 102
14:45-15:00	O-38 Modal Characteristics of Plasmonic Nanostrip Waveguides and Their Functional Devices <u>Hyun-Shik Lee</u> , Jun-Hwa Song and El-Hang Lee <i>Inha University, Korea</i> - 77 -	O-43 Tuning of Surface Plasmon Resonance Wavelengths by Structural Control of Inorganic Nanoparticles <u>T. Teranishi</u> , C. Li, M. Kanehara and S. Gwo <i>University of Tsukuba, Japan</i> - 82 -
15:00-15:15	O-39 Hybrid plasmonic waveguide in multilayer metallic-dielectric cylindrical nanostructure <u>Ying Gu</u> , Xiaoyong Hu, Baoqing Sun, Limin Tong and Qihuang Gong <i>Peking University, China</i> - 78 -	O-44 Colloidal nanoparticle ensembles trapped by a tightly focused laser beams with linear and radial polarizations <u>H. Daniel</u> , Ou-Yang, Joseph Junio, M. T. Wei, Yi Hu, Jack Ng and Qiwen Zhan <i>Lehigh University, USA</i> - 83 -
15:15-15:30	O-40 Metal-nanoshell/quantum-dot array waveguides with compensated loss <u>P. Holmström</u> , L. Thylén, and A. Bratkovsky <i>Royal Institute of Technology (KTH), Sweden</i> - 79 -	O-45 Light localization and delocalization in two-dimensional array of cavity-containing metallic nanoparticles <u>Z. L. Wang</u> , C. J. Tang, Z. Chen, H. Dong, P. Zhan and N. B. Ming <i>Nanjing University, China</i> - 84 -
15:30-15:45	O-41 Plasmonic Waveguide Filters Based on Tunneling Effects <u>Peng-Hsiao Lee</u> and Yung-Chiang Lan <i>National Cheng Kung University, China</i> - 80 -	O-46 Observation of higher band gap solitons in 2D photonic lattices <u>Daohong Song</u> , Cibo Lou, Jingjun Xu and Zhigang Chen <i>Nankai University, China</i> - 85 -
15:45-16:15	Coffee Break	
	Room : 3F 300 (Convention Hall)	Room : 1F 102
16:15-17:45	W-P- 3 : Integrated Nanophotonics Chair : Yan Li and Yoshimasa Sugimoto	W-P-4 : SNOM Technology Chair : Rainer Heintzmann and Yoichi Uehara
16:15-16:45	IN-21 Carbon Nanotube Nonlinear Photonics <u>Y. Sakakibara</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i> - 28 -	IN-23 Characterization of Plasmonic Nanostructures by Using Scanning Near-field Optical Microscopy <u>X. Zhu</u> , Z. Y. Fang, S. Huang and F. Lin <i>Peking University, China</i> - 30 -
16:45-17:15	IN-22 Silicon nanophotonic waveguide devices <u>H. K. Tsang</u> , X. Chen, L. Xu, C.Y. Wong, S. M. G. Lo, K. Y. Fung, C. Li <i>The Chinese University of Hong Kong, China</i> - 29 -	IN-24 The electro-magnetic nature of light at the nanoscale <u>D. van Oosten</u> , M. Burresi, and L. (Kobus) Kuipers <i>FOM Institute AMOLF, The Netherlands</i> - 31 -
17:15-17:30	O-47 Hybrid III-V Photonic Crystal wire cavity Laser on Silicon Wire <u>F. Rainieri</u> , Y. Halioua, A. Bazin, T. J. Karle, P. Monnier, I. Sagnes, G. Roelkens and R. Raj <i>Laboratoire de Photonique et de Nanostructures, (CNRS-UPR20), France</i> - 86 -	O-49 Nanooptical Characterization of Plasmonic Nanostructures and Devices with Single and Multiprobe NSOM <u>A. Lewis</u> <i>The Hebrew University of Jerusalem, Israel</i> - 88 -
17:30-17:45	O-48 Designing plasmonic circuits for controlling light at the nanoscale <u>T. J. Davis</u> , D. E. Gómez and K. C. Vernon <i>CSIRO Materials Science and Engineering, Australia</i> - 87 -	O-50 Mapping of quantum-Hall edge channels by a dilution-refrigerator based near-field scanning optical microscope <u>H. Ito</u> , K. Furuya, Y. Shibata, Y. Ootuka, S. Nomura, S. Kashiwaya, M. Yamaguchi, H. Tamura and T. Akazaki <i>University of Tsukuba , Japan</i> - 89 -

18:30-20:30	Conference Banquet (Hotel Grand Shinonome)
-------------	---

Thursday, June 3, 2010		
	Room : 3F 300 (Convention Hall)	Room : 4F 405
08:30-10:00	Th-A-1 : THz / Metamaterials Chair : Hong Chen and Didier Felbacq	Th-A-3 : Solar Cells 1 Chair : Kijung Yong and Liyuan Han
08:30-09:00	IN-25 Active Terahertz Naoresonators <u>D. S. Kim</u> , Minah Seo, J. S. Kyung, H. R. Park, H. S. Kim, K. J. Ahn, S. M. Koo, N. K. Park, B. J. Kim and H. T. Kim <i>Seoul National University, Korea</i> - 32 -	IN-29 Hybrid Photovoltaic Cells based Conjugated Polymers and CdSe Nanoparticles <u>Jiangeng Xue</u> , Renjia Zhou, Lei Qian, Ying Zheng, Jihua Yang, Aiwei Tang, and Paul H. Holloway <i>University of Florida, USA</i> - 36 -
09:00-09:30	IN-26 Fractal plasmonic metamaterials for subwavelength imaging and perfect absorbing <u>Lei Zhou</u> <i>Fudan University, China</i> - 33 -	IN-30 Development of semiconductor quantum dot sensitized solar cells by controlling interfacial electron transfer kinetics <u>Y. Tachibana</u> <i>Osaka University, Japan</i> - 37 -
09:30-09:45	O-51 Disordered terahertz metamaterials <u>Ranjan Singh</u> , Xinchao Lu, Jianqiang Gu, Zhen Tian and Weili Zhang <i>Oklahoma State University, USA</i> - 90 -	O-56 Efficient solid-state dye-sensitized solar cells based on a high molar extinction coefficient metal free sensitizer <u>Soo-Jin Moon</u> , Shaik M. Zakeeruddin, Peng Wang and Michael Grätzel <i>Swiss Federal Institute of Technology, Switzerland</i> - 95 -
09:45-10:00	O-52 Terahertz current oscillation and chaotic dynamics in carbon nanotubes <u>C. Wang</u> and J. C. Cao <i>Shanghai Institute of Microsystem and Information Technology, CAS, China</i> - 91 -	O-57 Organic Photovoltaics Based on Charge Transfer Transitions of Surface Complexes Formed of TiO ₂ and TCNQ Derivatives <u>J. Fujisawa</u> , N. Honda, Y. Sanehira, J. Nakazaki, S. Uchida, Y. Kubo and H. Segawa <i>The University of Tokyo, Japan</i> - 96 -
10:00-10:30	Coffee Break	
	Room : 3F 300 (Convention Hall)	Room : 4F 405
10:30-12:15	Th-A-2 : Metamaterials Chair : Dai-Sik Kim and Lei Zhou	Th-A-4 : Solar Cells 2 Chair : Katsuhiko Akimoto and Yasuhiro Tachibana
10:30-11:00	IN-27 Ultrafast spectroscopy of single plasmonic nanostructures: Nanoantennas for quantum emitters and nanomechanics <u>M. Lippitz</u> <i>Max-Planck-Institute for Solid State Research, Germany</i> - 34 -	IN-31 Fabrication of heterostructured ZnO nanowires and applications: photochemical energy conversion and wettability control <u>K. Yong</u> <i>Pohang University of Science and Technology, Korea</i> - 38 -
11:00-11:30	IN-28 Optical metamaterials based on multilayer dielectric structures <u>Yong Sun</u> , Chunhua Xue, Jiyong Kuo, Guiqing Du, Haitao Jiang and <u>Hong Chen</u> <i>Tongji University, China</i> - 35 -	IN-32 Dye-sensitized Solar Cells with Nanotechnologies <u>Liyuan Han</u> <i>National Institute for Materials Science, Japan</i> - 39 -
11:30-11:45	O-53 Homogenization of metallic metamaterials and electrostatic resonances <u>D. Felbacq</u> , B. guizal, F. Zolla and G. Bouchitté <i>Institut Universitaire de France, France</i> - 92 -	O-58 Photoresponse properties of semiconducting BaSi ₂ epitaxial films grown on the tunnel junction for photovoltaic applications <u>T. Saito</u> , Y. Matsumoto, M. Takeishi, R. Sasaki and T. Suemasu <i>University of Tsukuba, Japan</i> - 97 -
11:45-12:00	O-54 MEMS-Enabled Mechanically Tunable Negative-Index Photonic Crystal Lens <u>Y. Cui</u> , V. A. Tamma, J.-B. Lee and W. Park <i>The University of Texas at Dallas, USA</i> - 93 -	O-59 Nano-optical effects in thin-film silicon solar cells <u>T. Beckers</u> , K. Bittkau and R. Carius <i>Forschungszentrum Jülich GmbH, Germany</i> - 98 -
12:00-12:15	O-55 Topology Optimization of all-dielectric cloak in the optical frequency range <u>J. Andkjær</u> and O. Sigmund <i>Technical University of Denmark, Denmark</i> - 94 -	O-60 Absorbing light by a Compound Plasmonic Nanostructure <u>Y. X. Cui</u> , K. H. Fung, S. L. He and N. X. Fang <i>University of Illinois at Urbana-Champaign, USA</i> - 99 -
	Room : 3F 300 (Convention Hall)	
12:15-12:40	Closing Remarks Chair : Qiwen Zhan	

13:10-17:30	Optional Bus Tour
-------------	-------------------

LIST OF ORAL PRESENTATIONS

KEYNOTE LECTURE

KN-1	Nanophotonics: Dressed photon technology for innovative devices, fabrications, and systems <u>M. Ohtsu</u> <i>The University of Tokyo, Japan</i>	1
KN-2	Nanophotonics: Nanoscale control of Excitation Dynamics for New Applications in Healthcare and Energy <u>Paras N. Prasad</u> <i>The State University of New York at Buffalo, USA</i>	2

PLENARY LECTURE

PL-1	Subwavelength Photonics and Nanoimprint Technology – A Unique Path to Engineering New Optical Materials and Devices <u>Stephen Y. Chou</u> <i>Princeton University, USA</i>	3
PL-2	Sub-wavelength Photonics: from light manipulation to quantum levitation at the nanoscale <u>Federico Capasso</u> <i>Harvard University, USA</i>	4
PL-3	Dispersion-engineered photonic crystal waveguides for enhanced light-matter interaction <u>Thomas F. Krauss</u> <i>University of St Andrews, UK</i>	5
PL-4	Nanoscale Nonlinear Optics <u>C. Sibilia, A.Benedetti, A.Belardini, M.Centini, MC Larciprete, M.Bertolotti</u> <i>Universita' degli Studi di Roma La Sapienza, Italy</i>	6
PL-5	Achieving super-resolution in photolithography <u>J. T. Fourkas, L. Li, M. Stocker, R. R. Gattass, E. Gershgoren and H. Hwang</u> <i>University of Maryland, USA</i>	7

INVITED LECTURE

IN-01	III-V Semiconductor Nanowires for Optoelectronics Applications <u>C. Jagadish</u> <i>The Australian National University, Australia</i>	8
IN-02	Room-temperature nanoimprint using HSQ and its application <u>Shinji Matsui</u> <i>University of Hyogo, Japan</i>	9
IN-03	Recent progress on high-efficiency quantum dot solar cells <u>Shuhei Yagi and Yoshitaka Okada</u> <i>Saitama University, Japan</i>	10
IN-04	Assembled quantum dots in silica glass with bright photoluminescence <u>N. Murase</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	11
IN-05	Recent Progress of Manipulation of Photons by Photonic Crystals <u>S. Noda</u> <i>Kyoto University, Japan</i>	12
IN-06	Emission properties of excitons strongly localized to nitrogen pairs in GaAs <u>Yukihiro Harada and Takashi Kita</u> <i>Kobe University, Japan</i>	13
IN-07	H ₂ evolution from water by GaN photocatalyst <u>Kazuhiro Ohkawa</u> <i>Tokyo University of Science, Japan</i>	14
IN-08	Green nanophotonics to combat climate change <u>H. V. Demir</u> <i>Bilkent University, Turkey</i>	15
IN-09	Architectural nanophotonics and its impact on energy conversion <u>S. Y. Lin and M.-L. Hsieh</u> <i>Rensselaer Polytechnic Institute, USA</i>	16
IN-10	Low-dimensional plasmons in metallic atom sheets, atom chains and nano-sheets <u>T. Nagao, G. Han, C. Kubber, S. Yaginuma, C. Liu, C. Hoang, A. Pucci, D. Sanchez-Portal, S. Silkin, T. Inaoka</u> <i>National Institute for Materials Science, Japan</i>	17

IN-11	Single nanoparticle detection with high-Q whispering gallery resonator <u>Yun-Feng Xiao</u> <i>Peking University, China</i>	18
IN-12	Nanoplasmonics for Biosensing <u>A. V. Kabashin</u> <i>Université de Méditerranée, France</i>	19
IN-13	Plasmon Nano-optics: Harnessing Light and Heat at the Nanoscale for Biosciences <u>R. Quidant</u> <i>ICFO-Institut de Ciencies Fotoniques, Spain</i>	20
IN-14	Photochemistry on Nanoengineered Gold Structures <u>H. Misawa, K. Ueno, Y. Nishijima and Y. Yokota</u> <i>Hokkaido University, Japan</i>	21
IN-15	Structured Illumination and Image Inversion Interferometry <u>K. Wicker, M. Walde, E. R. Oldewurtel, S. Boehme, L. Hirvonen, O. Mandula, S. Sindbert, G.U. Nienhaus and R. Heintzmann</u> <i>King's College London, UK</i>	22
IN-16	Phonon detection using scanning tunneling microscope light emission spectroscopy <u>Y. Uehara</u> <i>Tohoku University, Japan</i>	23
IN-17	Controlling light at the nanoscale with plasmonic antennas: applications for sensing and trapping <u>Olivier. J. F. Martin</u> <i>Swiss Federal Institute of Technology Lausanne (EPFL), Switzerland</i>	24
IN-18	Dielectric-loaded surface plasmon–polariton nanowaveguides fabricated by two-photon polymerization <u>Yan Li, Zhaopei Liu, Haibo Cui, Hao Luo, Hong Yang, Qihuang Gong</u> <i>Peking University, China</i>	25
IN-19	Spiral plasmonic lens as a miniature circular polarization analyzer <u>Weibin Chen, Zhi Wu, Don C. Abeyasinghe, Robert L. Nelson and Qiwen Zhan</u> <i>University of Dayton, USA</i>	26
IN-20	Coherent control of spontaneous emission of multi-level atom in artificial micro-nanostructured system <u>Xiudong Sun, Bing Zhang, and Xiangqian Jiang</u> <i>Harbin Institute of Technology, China</i>	27
IN-21	Carbon Nanotube Nonlinear Photonics <u>Y. Sakakibara</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	28
IN-22	Silicon nanophotonic waveguide devices <u>H. K. Tsang, X. Chen, L. Xu, C.Y. Wong, S. M. G. Lo, K. Y. Fung, C. Li</u> <i>The Chinese University of Hong Kong, China</i>	29
IN-23	Characterization of Plasmonic Nanostructures by Using Scanning Near-field Optical Microscopy <u>X. Zhu, Z. Y. Fang, S. Huang and F. Lin</u> <i>Peking University, China</i>	30
IN-24	The electro-magnetic nature of light at the nanoscale <u>D. van Oosten, M. Burresi, and L. (Kobus) Kuipers</u> <i>FOM Institute AMOLF, The Netherlands</i>	31
IN-25	Active Terahertz Nanoresonators <u>D. S. Kim, Minah Seo, J. S. Kyoung, H. R. Park, H. S. Kim, K. J. Ahn, S. M. Koo, N. K. Park, B. J. Kim and H. T. Kim</u> <i>Seoul National University, Korea</i>	32
IN-26	Fractal plasmonic metamaterials for subwavelength imaging and perfect absorbing <u>Lei Zhou</u> <i>Fudan University, China</i>	33
IN-27	Ultrafast spectroscopy of single plasmonic nanostructures: Nanoantennas for quantum emitters and nanomechanics <u>M. Lippitz</u> <i>University of Stuttgart, Germany</i>	34
IN-28	Optical metamaterials based on multilayer dielectric structures <u>Yong Sun, Chunhua Xue, Jiyong Kuo, Guiqing Du, Haitao Jiang and Hong Chen</u> <i>Tongji University, China</i>	35
IN-29	Hybrid Photovoltaic Cells based Conjugated Polymers and CdSe Nanoparticles <u>Jiangeng Xue, Renjia Zhou, Lei Qian, Ying Zheng, Jihua Yang, Aiwei Tang, and Paul H. Holloway</u> <i>University of Florida, USA</i>	36

IN-30	Development of semiconductor quantum dot sensitized solar cells by controlling interfacial electron transfer kinetics <u>Y. Tachibana</u> <i>Osaka University, Japan</i>	37
IN-31	Fabrication of heterostructured ZnO nanowires and applications: photochemical energy conversion and wettability control <u>K. Yong</u> <i>Pohang University of Science and Technology, Korea</i>	38
IN-32	Dye-sensitized Solar Cells with Nanotechnologies <u>Liyuan Han</u> <i>National Institute for Materials Science, Japan</i>	39

ORAL PRESENTATION

O-01	Imprint-Mold-Cleaning by Vacuum Ultraviolet Light <u>M. Nakao, M. Yamaguchi and S. Yabu</u> <i>National Institute of Information and Communications Technology, Japan</i>	40
O-02	Wafer-Scale Highly Ordered Porous Alumina on Substrates <u>T. S. Kustandi, W. W. Loh, H. Gao and H. Y. Low</u> <i>Agency for Science, Technology and Research (A*STAR), Singapore</i>	41
O-03	Formation of reversible micro-structures in lithium niobate by femtosecond direct laser writing technique <u>V. Mizeikis, W. Inami and Y. Kawata</u> <i>Shizuoka University, Japan</i>	42
O-04	Surface Patterning using Gold and Dielectric Nanoparticles Excited by Femtosecond Laser <u>M. Terakawa and M. Obara</u> <i>Keio University, Japan</i>	43
O-05	A CAD-integrated Approach for Micro Manufacturing with the Two-photon Polymerization Technique <u>Chih-Lang Lin, Chin-Te Lin, Chao-Yaug Liao, Yue-Lun Yang, Patrice L. Baldeck and Tien-Tung Chung</u> <i>National Taiwan University, Taiwan</i>	44
O-06	Fabrication of the Optical Fiber Incorporated with Zinc Oxide Nano-particles and its Optical Nonlinearity <u>Seongmin Ju, Pramod R. Watekar, Seongmook Jeong, Youngwoong Kim and Won-Taek Han</u> <i>Gwangju Institute of Science and Technology, Korea</i>	45
O-07	Nanochain and nanosphere through organosilane mediated gold nanoparticles assembly <u>M. Khorasaninejad and S. S. Saini</u> <i>University of Waterloo, Canada</i>	46
O-08	Optical property of erbium/bismuth co-doped zeolites <u>Zhenhua Bai, Hong-Tao Sun, Takashi Hasegawa, Minoru Fujii, Fumiaki Shimaoka, Yuji Miwa, Minoru Mizuhata and Shinji Hayashi</u> <i>Kobe University, Japan</i>	47
O-09	Characters of MgX (X = Te, Se, S and O) clusters: conformations, bonding characters, absorption spectra and Orbitals <u>Shuhong Xu, Chunlei Wang, Yiping Cui</u> <i>Southeast University, China</i>	48
O-10	On magneto-optical properties of the plasmonic heterostructures <u>V. I. Belotelov, A. N. Kalish, V. A. Kotov, A. K. Zvezdin, I. A. Akimov and M. Bayer</u> <i>M.V. Lomonosov Moscow State University, Russia</i>	49
O-11	Ultra-short optical pulse generation with single layer graphene <u>C. C. Lee, G. Acosta, J. S. Bunch and T. R. Schibli</u> <i>University of Colorado, USA</i>	50
O-12	Reliability Study of InGaN/GaN MQWs LEDs with different growth parameters <u>K. K. Leung, W. K. Fong and C. Surya</u> <i>The Hong Kong Polytechnic University, China</i>	51
O-13	Angular emission pattern of photonic crystal micro-cavities <u>M. Abbarchi, F. Intonti, F. Riboli, S. Vignolini, A. Vinattieri, L. Balet, L. H. Li, A. Gerardino, M. Francardi, A. Fiore and M. Gurioli</u> <i>National Institute for Materials Science, Japan</i>	52
O-14	Room temperature lasing behaviour at 1.55 μ m on high quality factor ($Q > 55000$) InP-based photonic crystal microcavities with quantum wires <u>L. J. Martínez, B. Alén, I. Prieto, D. Fuster, Y. González, L. González, M. L. Dotor, L. E. Muñoz, M. Kaldırım and P. A. Postigo</u> <i>Instituto de Microelectrónica de Madrid (IMM-CNM-CSIC), Spain</i>	53

O-15	Plasmonic Waveguiding in Nano-metallic-wire-filled Photonic Crystal Fiber Taper <u>Z. X. Zhang</u> , M. L. Hu, K. T. Chan and Q. Y. Wang <i>The Chinese University of Hong Kong, China</i>	54
O-16	Promotion of methane steam reforming under spectrally controlled irradiated thermal radiation <u>Y. Maegami</u> , F. Iguchi and H. Yugami <i>Tohoku University, Japan</i>	55
O-17	Direct Nano-Bio Energy Transfer in Novel Biosensing Electrodes <u>M. Griep</u> , C. Friedrich and S. Karna <i>U. S. Army Research Laboratory, USA</i>	56
O-18	High Efficiency Light Emitters and Receivers using Nanostructure- controlled Surface Plasmon Coupling <u>K. Okamoto</u> , R. Bardoux and Y. Kawakami <i>Kyoto University, Japan</i>	57
O-19	Directional and Polarization Properties of a Plasmonic Cross Nanoantenna Dinesh Kumar V. <i>Indian Institute of Information Technology Design and Manufacturing, India</i>	58
O-20	Plasmonic filters for snapshot infrared multispectral imaging <u>G. Vincent</u> , S. Collin, R. Haidar , S. Rommeluer, N. Bardou and J.-L. Pelouard <i>The French aerospace lab, France</i>	59
O-21	Comparisons of Surface Plasmon Sensitivities in Gold Nanostructures Using a Multispectral Analysis <u>Kuang-Li Lee</u> and Pei-Kuen Wei <i>Research Center for Applied Sciences, Academia Sinica, Taiwan</i>	60
O-22	Super-Periodic Nanohole Array for Integrated Surface Plasmon Resonance Sensor <u>Junpeng Guo</u> , Hai Sheng Leong, Boyang Zhang, Yongbin Lin, Robert G. Lindquist and David J. Brady <i>University of Alabama in Huntsville, USA</i>	61
O-23	Polarization-Analyzing Image Sensor in 65nm CMOS Process <u>S. Shishido</u> , T. Noda, K. Sasagawa, T. Tokuda and J. Ohta <i>Nara Institute of Science and Technology, Japan</i>	62
O-24	Strong non-resonant photoluminescence enhancement in InGaN/GaN quantum wells with embedded Au nanocrystals <u>A. A. Krokhin</u> , A. Llopis, J. Lin, S. M. S. Pereira, T. Trindade, M. A. Martins, I. M. Watson and A. Neogi <i>University of North Texas, USA</i>	63
O-25	SERS performance of silver nanoparticle patterns by masked ion-exchange process <u>Ya Chen</u> , Janne Jaakola, Antti Säynätjoki, Ari Tervonen and Seppo Honkanen <i>Aalto University, Finland</i>	64
O-26	Intracellular pH Sensing in Cells Using Fluorescence Lifetime Imaging of Fluorescent Proteins <u>T. Nakabayashi</u> , S. Oshita, R. Sumikawa, F. Sun, M. Kinjo and N. Ohta <i>Hokkaido University, Japan</i>	65
O-27	SERS-based aqueous immunoassay realized with immune silica nanoparticles <u>C. Y. Song</u> , Z. Y. Wang, J. Yang, R. H. Zhang, H. Wu and Y. P. Cui <i>Southeast University, China</i>	66
O-28	Optical Assessment of The Intracellular "Nano" Organelles- The Mitochondria in Health and Disease <u>A. Mayevsky</u> <i>Bar-Ilan University, Israel</i>	67
O-29	Fabrication of Au nanorings and their application to image quality improvement through localized surface plasmon resonance in optical coherence tomography <u>Hung-Yu Tseng</u> , Cheng-Kuang Lee, Shou-Yen Wu, Ting-Ta Chi, Kai-Min Yang, Jyh-Yang Wang, Yean-Woei Kiang, C. C. Yang and Meng-Tsan Tsai <i>National Taiwan University, Taiwan</i>	68
O-30	Optical Properties of ZnO Nanoparticles Capped by Polyethylene Glycol S. Tachikawa, A. Noguchi, M. Hara, O. Odawara and <u>H. Wada</u> <i>Tokyo Institute of Technology, Japan</i>	69
O-31	Closely adjacent Ag nanoparticles formed by cationic dyes yielding enormous SERS activity <u>M. Futamata</u> , Y. Yu, T. Yanatori and T. Kokubun <i>Saitama University, Japan</i>	70
O-32	Demonstration of strong localization of surface enhanced Raman scattering on individual symmetry-reduce metallic nanoparticles <u>J. Ye, C. Chen</u> , L. Lagae, G. Maes, G. Borghs and P. Van Dorpe <i>IMEC, Belgium</i>	71

O-33	Surface enhanced Raman scattering spectra affected by the refractive index of media around single Ag nanoparticle dimmers <u>Tamitake Itoh</u> , Ken-ichi Yoshida, Asudevanpillai Biju, Mitsuru Ishikawa and Yukihiro Ozaki <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	72
O-34	Imaging of plasmon wavefunctions using scanning near-field optical microscope <u>K. Imura</u> and H. Okamoto <i>Waseda University, Japan</i>	73
O-35	Surface plasmon enhancement of coherent phonons in an ion-implanted graphite <u>I. Katayama</u> , S. Koga, J. Takeda, T. Shimada, S. Hishita, D. Fujita and M. Kitajima <i>Yokohama National University, Japan</i>	74
O-36	Near-Field CARS with Nanosphere <u>C. H. Raymond Ooi</u> <i>University of Malaya, Malaysia</i>	75
O-37	Surface Plasmon Polariton Enhancement in Ag Nanowire-Nanoantenna Optical Circuits <u>Zhe-yu Fang</u> , Chen-fang Lin, Shan Huang and Xing Zhu <i>Peking University, China</i>	76
O-38	Modal Characteristics of Plasmonic Nanostrip Waveguides and Their Functional Devices <u>Hyun-Shik Lee</u> , Jun-Hwa Song and El-Hang Lee <i>Inha University, Korea</i>	77
O-39	Hybrid plasmonic waveguide in multilayer metallic-dielectric cylindrical nanostructure <u>Ying Gu</u> , Xiaoyong Hu, Baoqing Sun, Limin Tong and Qihuang Gong <i>Peking University, China</i>	78
O-40	Metal-nanoshell/quantum-dot array waveguides with compensated loss <u>P. Holmström</u> , L. Thylén, and A. Bratkovsky <i>Royal Institute of Technology (KTH), Sweden</i>	79
O-41	Plasmonic Waveguide Filters Based on Tunneling Effects <u>Peng-Hsiao Lee</u> and Yung-Chiang Lan <i>National Cheng Kung University, China</i>	80
O-42	Wavefront Control Using Spatially Modulated Aperture Arrays in Metal Films <u>L. Lin</u> , X. M. Goh and A. Roberts <i>University of Melborn, Australia</i>	81
O-43	Tuning of Surface Plasmon Resonance Wavelengths by Structural Control of Inorganic Nanoparticles <u>T. Teranishi</u> , C. Li, M. Kanehara and S. Gwo <i>Univeristy of Tsukuba, Japan</i>	82
O-44	Colloidal nanoparticle ensembles trapped by a tightly focused laser beams with linear and radial polarizations <u>H. Daniel Ou-Yang</u> , Joseph Junio, M. T. Wei, Yi Hu, Jack Ng and Qiwen Zhan <i>Lehigh University, USA</i>	83
O-45	Light localization and delocalization in two-dimensional array of cavity-containing metallic nanoparticles <u>Z. L. Wang</u> , C. J. Tang, Z. Chen, H. Dong, P. Zhan and N. B. Ming <i>Nanjing University, China</i>	84
O-46	Observation of higher band gap solitons in 2D photonic lattices <u>Daohong Song</u> , Cibo Lou, Jingjun Xu and Zhigang Chen <i>Nankai University, China</i>	85
O-47	Hybrid III-V Photonic Crystal wire cavity Laser on Silicon Wire <u>F. Rainieri</u> , Y. Halioua, A. Bazin, T. J. Karle, P. Monnier, I. Sagnes, G. Roelkens and R. Raj <i>Laboratoire de Photonique et de Nanostructures, (CNRS-UPR20), France</i>	86
O-48	Designing plasmonic circuits for controlling light at the nanoscale <u>T. J. Davis</u> , D. E. Gómez and K. C. Vernon <i>CSIRO Materials Science and Engineering, Australia</i>	87
O-49	Nanoptical Characterization of Plasmonic Nanostructures and Devices with Single and Multiprobe NSOM <u>A. Lewis</u> <i>The Hebrew University of Jerusalem, Israel</i>	88
O-50	Mapping of quantum-Hall edge channels by a dilution-refrigerator based near-field scanning optical microscope <u>H. Ito</u> , K. Furuya, Y. Shibata, Y. Ootuka, S. Nomura, S. Kashiwaya, M. Yamaguchi, H. Tamura and T. Akazaki <i>University of Tsukuba , Japan</i>	89
O-51	Disordered terahertz metamaterials <u>Ranjan Singh</u> , Xinchao Lu, Jianqiang Gu, Zhen Tian and Weili Zhang <i>Oklahoma State University, USA</i>	90

O-52	Terahertz current oscillation and chaotic dynamics in carbon nanotubes <u>C. Wang</u> and J. C. Cao <i>Shanghai Institute of Microsystem and Information Technology, CAS, China</i>	91
O-53	Homogenization of metallic metamaterials and electrostatic resonances <u>D. Felbacq</u> , B. guizal, F. Zolla and G. Bouchitté <i>Institut Universitaire de France, France</i>	92
O-54	MEMS-Enabled Mechanically Tunable Negative-Index Photonic Crystal Lens <u>Y. Cui</u> , V. A. Tamma, J.-B. Lee and W. Park <i>The University of Texas at Dallas, USA</i>	93
O-55	Topology Optimization of all-dielectric cloak in the optical frequency range <u>J. Andkjaer</u> and O. Sigmund <i>Technical University of Denmark, Denmark</i>	94
O-56	Efficient solid-state dye-sensitized solar cells based on a high molar extinction coefficient metal free sensitizer <u>Soo-Jin Moon</u> , Shaik M. Zakeeruddin, Peng Wang and Michael Grätzel <i>Swiss Federal Institute of Technology, Switzerland</i>	95
O-57	Organic Photovoltaics Based on Charge Transfer Transitions of Surface Complexes Formed of TiO ₂ and TCNQ Derivatives <u>J. Fujisawa</u> , N. Honda, Y. Sanehira, J. Nakazaki, S. Uchida, Y. Kubo and H. Segawa <i>The University of Tokyo, Japan</i>	96
O-58	Photoresponse properties of semiconducting BaSi ₂ epitaxial films grown on the tunnel junction for photovoltaic applications <u>T. Saito</u> , Y. Matsumoto, M. Takeishi, R. Sasaki and T. Suemasu <i>University of Tsukuba, Japan</i>	97
O-59	Nano-optical effects in thin-film silicon solar cells <u>T. Beckers</u> , K. Bittkau and R. Carius <i>Forschungszentrum Jülich GmbH, Germany</i>	98
O-60	Absorbing light by a Compound Plasmonic Nanostructure <u>Y. X. Cui</u> , K. H. Fung, S. L. He and N. X. Fang <i>University of Illinois at Urbana-Champaign, USA</i>	99

LIST OF POSTER PRESENTATIONS

Nanofabrication

P-A01	A Roller manufacturing Machine for Fabricating Sub-micron Structures on the Roller for Nano-Imprint Lithography <u>Yen-Ting Kuo, Lien-Sheng Chen, Chin-Te Lin, Pei-Chun Chen, Jia-Yush Yen and Tien-Tung Chung</u> <i>National Taiwan University, Taiwan</i>	101
P-A02	Fabrication of Roller Mold with Spherical Microlens Structure Array based on Particles Self-assembly for Roll-to-Roll Process <u>Cheng-Hsin Chuang and Yu-Liang Chen</u> <i>Southern Taiwan University, Tainan</i>	102
P-A03	Low-Tg bismuth phosphate glasses for glass-imprinting and fabrication of 2D sub-wavelength structure <u>N. Kitamura, J. Nakamura, K. Fukumi, T. Hidaka, T. Ikeda, H. Hashima and J. Nishii</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	103
P-A04	Large-area near-infrared metamaterials fabricated via angle-resolved nanosphere lithography <u>Z. Chen, Z. S. Cao, J. Pan, P. Zhan and Z. L. Wang</u> <i>Nanjing University, China</i>	104
P-A05	Surface plasmon coupling enhanced dielectric environment sensitivity in a quasi-three-dimensional metallic nanohole array <u>P. Zhan, Y. Y. Li, J. Pan, N. B. Ming, and Z. L. Wang</u> <i>Nanjing University, China</i>	105
P-A06	Silicon nanostructures with quantum confinement by electron beam induced deposition lithography <u>I. Sychugov, Y. Nakayama and K. Mitsuishi</u> <i>National Institute for Materials Science, Japan</i>	106
P-A07	Line edge roughness reduction by photo resist trimming <u>Jingnan Cai, Peng Huei Lim, Yasuhiko Ishikawa and Kazumi Wada</u> <i>The University of Tokyo, Japan</i>	107
P-A08	Nanofabrication with Pulsed Lasers <u>A. V. Kabashin, Ph. Delaporte, D. Grojo, A. Pereira, P. Blandin, Th. Sarnet and M. Sentis</u> <i>Université de Méditerranée, France</i>	108
P-A09	Three-dimensional molding process based on two-photon microstereo-lithography using ceramic slurry <u>M. Inada, D. Hiratsuka, J. Tatami and S. Maruo</u> <i>Yokohama National University, Japan</i>	109
P-A10	Gold pattern formation by femto-second laser-induced technique <u>B. H. Chen, M. L. Tzeng, C. M. Chang, C. H. Chu, W. T. Chen, C. H. Lu, P. C. Wu, C. J. Chen, S. C. Yen and D. P. Tsai</u> <i>National Taiwan University, Taiwan</i>	110
P-A11	Polymer Nanowires Produced by Pulsed Laser Light <u>M. Goto, A. Kasahara and M. Tosa</u> <i>National Institute for Materials Science, Japan</i>	111
P-A12	Exciton Polariton Photonic Circuits from Organic Dye Nanofibers <u>K. Takazawa, J. Inoue, K. Mitsuishi and T. Takamatsu</u> <i>National Institute for Materials Science, Japan</i>	112
P-A13	Optical waveguiding of organic nanowires <u>Jeongyong Kim, Dae-Chul Kim, Jinwoo Lee and Jinsoo Joo</u> <i>University of Incheon, Korea</i>	113
P-A14	Surface plasmon-assisted photopolymerization on various gold nanostructures <u>T. Yokoyama, A. Masuhara, T. Onodera, H. Kasai and H. Oikawa</u> <i>Tohoku University, Japan</i>	114
P-A15	Laser Light Control of Self-organization Process <u>Y. Matsumura, W. Inami and Y. Kawata</u> <i>Shizuoka University, Shizuoka, Japan</i>	115
P-A16	Micron size polymer sphere arrays for photonic applications <u>Y. Kiyono and O. Karthaus</u> <i>Chitose Institute of Science and Technology, Japan</i>	116
P-A17	In-situ passivation of porous silicon by LaF ₃ using a simple single-source chemical bath technique. <u>Abu Bakar Md. Ismail, Abdul Al Mortuza, Khondakar Shamsul Arefin and A. K. M. Badrul Alam</u> <i>Rajshahi University, Bangladesh</i>	117

Nanoparticle Plasmonics/ Plasmonic Enhancement

P-A18	Surface plasmon resonance and interband transitions of metal nanoparticles: What are the “interband transitions”? <u>H. Amekura</u> , M. Tanaka, H. Yoshikawa, H. Shinotsuka, S. Tanuma, N. Ishikawa, M. Ohnuma, Y. Matsushita, K. Kobayashi and N. Kishimoto <i>National Institute for Materials Science, Japan</i>	118
P-A19	Radiation photonics: A case of metal-nanoparticle composites <u>O.A. Plaksin</u> , Y. Takeda, K. Kono, H. Amekura and N. Kishimoto <i>SSC RF - Institute for Physics and Power Engineering, Russia</i>	119
P-A20	Spectral and power dependence of optical nonlinearity of metal nanoparticle materials <u>Y. Takeda</u> , H. Momida, R. Sato, M. Ohnuma, T. Ohno and N. Kishimoto <i>National Institute for Materials Science, Japan</i>	120
P-A21	Size dependence of nonlinear optical properties of Ag nanoparticles <u>R. Sato</u> , H. Momida, M. Ohnuma, T. Ohno and Y. Takeda <i>University of Tsukuba, Japan</i>	121
P-A22	Surface Enhanced Second Harmonic Generation of Dye-adsorbed Silver Nanoparticles <u>Zhuyuan Wang</u> , Wang Li, Zhiqiang Zhou, Binfeng Yun, Guohua Hu, Yuan Zhong and Yiping Cui <i>Southeast University, China</i>	122
P-A23	Dielectric analysis on optical properties of ZrO_2 thin films dispersed with silver nanoparticles <u>M. Wakaki</u> and E. Yokoyama <i>Tokai University, Hiratsuka, Japan</i>	123
P-A24	Solid Immersion Lens with Gold Nanoparticles for Localized Surface Plasmon Microscopy T. Kishi, <u>S. Furusawa</u> , A. Yasumori, T. Yano and S. Shibata <i>Tokyo Institute of Technology, Japan</i>	124
P-A25	Photoproperties of Gold Nanorods on Substrates in the Presence of Magnetic Processing <u>H. Yonemura</u> , N. Sakai, J. Suyama and S. Yamada <i>Kyushu University, Japan</i>	125
P-A26	Optical phonons in ZnS nanowires, nanocombs, and nanosheets <u>Heesuk Rho</u> , Jin Heung Kim, Young-Jin Choi and Jae-Gwan Park <i>Chonbuk National University, Korea</i>	126
P-A27	Formation of In/Ag Compound Nano Clusters studied by UHV-TEM/STM <u>M. Tanaka</u> and M. Shimojo <i>National Institute for Materials Science, Japan</i>	127
P-A28	Novel Metal-Polymer Composite Particles for Nanophotonic Materials <u>H. Yabu</u> , A. Endo, T. Nakanishi, K. Koike, K. Motoyoshi, T. Higuchi and M. Shimomura <i>Tohoku University, Sendai, Japan</i>	128
P-A29	Optical Limiting Characteristics of Core-Shell Nanoparticles <u>G. Vinitha</u> and A. Ramalingam <i>B S Abdur Rahman University, India</i>	129
P-A30	Optical rectification in self-assembled monolayers probed at surface plasmon resonance condition <u>D. Tanaka</u> , R. Uzawa, H. Okawa, K. Hashimoto, and K. Kajikawa <i>Tokyo Institute of Technology, Japan</i>	130
P-A31	Modeling of surface plasmon-based ultrafast photoelectron source <u>A. Arsenin</u> , D. Fedyanin, A. Gladun, V. Leiman, V. Semenenko and V. Tarakanov <i>Moscow Institute of Physics and Technology (State University), Russia</i>	131
P-A32	The Study of External Emission Co-plane Schottky Diode Based Detector in Surface Plasmon Resonance Sensing <u>Chien-Sheng Liu</u> , Tsun-Yu Wen, Da-Shin Wang and Chii-Wann Lin <i>National Taiwan University, Taiwan</i>	132
P-A33	Enhancement of optical birefringence by the presence of localized surface plasmon resonance <u>S. Murai</u> , R. Hattori, K. Fujita and K. Tanaka <i>Kyoto University, Japan</i>	133
P-A34	The Giant Birefringence in Plasmonic Nanostructures <u>Shen-Yu Hsu</u> , Kuang-Li Lee and Pei-Kuen Wei <i>Research Center for Applied Sciences, Academia Sinica, Taiwan</i>	134
P-A35	Spatio-temporal control of local plasmon on Au nano-rods generated by chirped femtosecond laser pulse <u>T. Harada</u> , K. Matsuishi, N. Sugiura, J. Ohi, Y. Oishi, and F. Kannari <i>Keio University, Japan</i>	135
P-A36	Negative Refraction in Planar Plasmonic Waveguides <u>J. Takahara</u> , K. Kamada and T. Nagatsuma <i>Osaka University, Japan</i>	136

P-A37	Surface plasmon interference formed by tightly focused higher polarization order axially-symmetric polarized beams <i>Zhehai Zhou, Qiaofeng Tan and Guofan Jin</i> <i>Tsinghua University, China</i>	137
P-A38	Localised plasmon resonances on 1-D arrays of V-shaped gold and silver nanostructures <i>N Stokes, A. McDonagh and M.B. Cortie</i> <i>University of Technology Sydney, Australia</i>	138
P-A39	Full Three-Dimensional Subwavelength High-Q Surface-Plasmon-Polariton Cavity <i>Soon-Hong Kwon, Min-Kyo Seo, Ho-Seok Ee and Hong-Gyu Park</i> <i>Korea University, Korea</i>	139
P-A40	Controlled thermal emission of infrared waves based on engineered metallic nanostructures <i>H. T. Miyazaki, K. Ikeda, T. Kawaya, K. Yamamoto, Y. Inoue, K. Fujimura, T. Kanakugi, M. Okada, K. Hatade and S. Kitagawa</i> <i>National Institute for Materials Science, Japan</i>	140
Nanocharacterization		
P-A41	Optical Nanofibers for Probing Few-Atom Fluorescence <i>M. Das, K. P. Nayak, M. Morinaga, F. L. Kien and K. Hakuta</i> <i>University of Electro-Communications, Japan</i>	141
P-A42	Oxidizing rate restriction by voltage rise velocity on SPM-based nano lithography <i>T. Onuki and T. Tokizaki</i> <i>Tohoku University, Japan</i>	142
P-A43	Stability improvement of SPM-based anodic oxidation process by thin cap layer of valve metals <i>T. Onuki and T. Tokizaki</i> <i>Tohoku University, Japan</i>	143
P-A44	Micro Demultiplexer Fabricated by Convective-Assembly of Microspheres on a Patterned Substrate <i>T. Onodera, T. Hayashi, H. Oikawa, T. Mitsui, Y. Wakayama, N. Ikeda, Y. Sugimoto and T. Takamasu</i> <i>Tohoku University, Japan</i>	144
P-A45	Near-Field Mapping of the Huang-Rhys Parameter <i>A. Llopis and A. Neogi</i> <i>University of North Texas, USA</i>	145
P-A46	Imaging of Self-Organized Gold Nanoparticles by Apertureless SNOM <i>W. Chen, A. Kirilyuk, A. Stupakiewicz, A. Kimel, A. Maziewski and Th. Rasing</i> <i>Radboud University Nijmegen, The Netherlands</i>	146
P-A47	Passive near-field microscopy in long-wavelength infrared region <i>Y. Kajihara, K. Kosaka and S. Komiyama</i> <i>The University of Tokyo, Japan</i>	147
P-A48	Near-Field Photoluminescence Spectroscopy with an Optical Mask using Phase Change Material <i>N. Tsumori and T. Saiki</i> <i>Keio University, Japan</i>	148
P-A49	Carrier dynamics around localized gap states investigated by laser-combined scanning tunneling microscopy <i>Munenori Yokota, Yasuhiko Terada, Shoji Yoshida, Atsushi Okubo, Osamu Takeuchi and Hidemi Shigekawa</i> <i>University of Tsukuba, Japan</i>	149
Radiation Control / Plasmon Control		
P-A50	Deep-ultraviolet detector using submicron thick diamond epilayer: principle, device design, and application <i>M. Y. Liao, J. Alvarez, Y. Koide, M. Imura and J.-P Kleider</i> <i>National Institute for Materials Science, Japan</i>	150
P-A51	Far UV emitter based on hexagonal boron nitride <i>Kenji Watanabe, Takashi Taniguchi, Kenta Miya, Yoshitaka Sato, Kazuhito Nakamura, Takahiro Niyyama and Masateru Taniguchi</i> <i>National Institute for Materials Science, Japan</i>	151
P-A52	Growth of GaN-based blue light-emitting diodes by MOCVD using nanoscale SiO ₂ as epitaxial lateral overgrowth mask <i>W. K. Fong, K. K. Leung and C. Surya</i> <i>The Hong Kong Polytechnic University, China</i>	152
P-A53	Size-Tunable UV-Blue Luminescent Silicon Nanoparticles <i>N. Shirahata, T. Tsuruoka and Y. Sakka</i> <i>National Institute for Materials Science, Japan</i>	153
P-A54	UV-Visible emission from low energy ion implanted Si nanoparticles <i>K. G. Gryczynski, A. K. Singh and A. Neogi</i> <i>University of North Texas, USA</i>	154

P-A55	Long-range surface plasmons on anisotropic dielectric substrates <u>L. N. Gumen</u> , Nagaraj, A. Neogi and A. A. Krokhin <i>Universidad Popular Autónoma del Estado de Puebla, Mexico</i>	155
P-A56	Modification of Photoemission from GaAs/AlGaAs quantum wells due to self-assembled Ga droplets <u>J. Lin</u> , K. Gryczynski, J. Lee, Z. Wang, A. Krokhin, G. Salamo and A. Neogi <i>University of North Texas, USA</i>	156
P-A57	Generation of single green or red upconversion in 11 nm Yb ₃₊ /Ho ₃₊ codoped NaYF ₄ small nanocrystals by tridoping with Ce ₃₊ ions <u>Huijuan Liang</u> , Li Wu, Yangdong Zheng, Guanying Chen, Long Li, Yuan Liu, Wenwu Cao and Zhiguo Zhang <i>Harbin Institute of Technology, China</i>	157
P-A58	Photoluminescence Properties of a Series of Eu and Ce Co-doped (Ba, Sr) ₂ ZnS ₃ Solid Solutions Prepared by Polymerizable Complex Method <u>C.W Lee</u> , S. Tezuka V. Petrykin and M. Kakihana <i>Tohoku University, Japan</i>	158
P-A59	Surface plasmon polariton assisted light emitters <u>S. X. Lin</u> , C.-Y. Wong and E. Y. B. Pun <i>City University of Hong Kong, China</i>	159
P-A60	Emission color tuning by utilizing exciplex formation of organic light-emitting devices <u>S. L. Lai</u> , M. Y. Chan, Q. X. Tong, C. S. Lee and S. T. Lee <i>City University of Hong Kong, China</i>	160
P-A61	Host engineering for triplet exciton confinement in blue phosphorescent organic light emitting devices <u>M. Y. Chan</u> , P. K. Tsang and V. W. W. Yam <i>The University of Hong Kong, China</i>	161
P-A62	Photonic Property study of Organic Salt Doped Polymer Film in Microcavity <u>Lihua Ye</u> , Xi Chen, Deng Xu, Yiping Cui, Binfeng Yun, Jun Xi and Qiong Wang <i>Southeast University, China</i>	162
P-A63	Electrical tuning of Surface Plasmon Polaritons using Twisted Nematic Liquid Crystal on Metallic Grating Structure <u>Y. Ogawa</u> , M. Ojima, K. Murata, Y. Fujiwara, H. Kubo, H. Yoshida, A. Fujii and M. Ozaki <i>Osaka University, Japan</i>	163
P-A64	Polarization-independent refractive index modulation using photoresponsive nematic liquid crystals <u>K. Tagashira</u> , H. Yoshida, A. Fujii and M. Ozaki <i>Osaka University, Japan</i>	164
P-A65	Metal nanoparticle-dispersed liquid crystals fabricated by sputter-doping and its plasmonic properties <u>H. Yoshida</u> , K. Kawamoto, Y. Tanaka, T. Kumagai, H. Kubo, A. Fujii and M. Ozaki <i>Osaka University, Japan</i>	165
P-A66	Non-iridescent Structural Colors Generated by Self-assembled Amorphous Microstructures <u>M. H. Rashid</u> , M. N. Huda, A. B. Imran, T. Seki, Y. Takeoka, M. Ishii and H. Nakamura <i>Nagoya University, Japan</i>	166
P-A67	Coherent thermal emission in 1-D photonic crystals containing absorbing defect layer <u>Xiaoyuan Liu</u> , Zhongxiang Zhou and Yongyuan Jiang <i>Harbin Institute of Technology, China</i>	167
P-A68	Black-body radiation from one-dimensional optical materials <u>Takashi Tokizaki</u> <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	168
P-A69	Enhancing emission properties of rare earth ions embedded in chalcogenide glass via minute compositional adjustments <u>Yong Gyu Choi</u> <i>Korea Aerospace University, Korea</i>	169
P-A70	Study of transient thermal lensing effect in C ₆₀ -toluene solution <u>Che-Kai Chang</u> , Chang-Chi Leu, Tai-Huei Wei and Tzer-Hsiang Huang <i>National Chung Cheng University, Taiwan</i>	170
P-A71	The study of nonlinear optical properties in the semimetal Sb thin film <u>Yi-Ci Li</u> , Huei-Ling Lin and Tai-Heui Wei <i>National Chung Cheng University, Taiwan</i>	171
P-A72	Photorefractive Polymer with High Optical Gain under Non-Electric Field <u>J. Nishide</u> , H. Kimura, H. Sasabe and Y. Kawabe <i>Chitose Institute of Science & Technology, Japan</i>	172
P-A73	Evolution and self-deflection of separate spatial soliton pairs in series two-photon photorefractive media circuit <u>Baoyu Li</u> , Bo Guan and Chunfeng Hou <i>Harbin Institute of Technology, China</i>	173

Photocatalysis / Bionanosensing

P-A74	Selective Synthesis of Brookite, Anatase, Rutile by Hydrothermal Method using Titanium Peroxy Oxalate Complex and Their Photocatalytic Activity <u>Q. D. Truong</u> , M. Kobayashi, H. Kato, M. Kakihana, S. Yin and T. Sato <i>Tohoku University, Japan</i>	174
P-A75	The seeding effect on the microstructure and photocatalytic properties of ZnO nano powders <u>Shahab Khameneh Asl</u> , S.K. Sadrnezhaad and M. Kianpour rad <i>University of Tabriz, Iran</i>	175
P-A76	Metal-Decorated Cds Nanowires Prepared by Self-Reduction of Metal Ions and Their Photocatalytic Properties <u>Yung-Jung Hsu</u> , Yuan-Wei Chang and Wei-Ta Chen <i>National Chiao Tung University, China</i>	176
P-A77	Formation of photocatalytic TiO ₂ mesoporous honeycomb films <u>K. Kon</u> , T. Meiling and O. Karthaus <i>Chitose Institute of Science and Technology, Japan</i>	177
P-A78	Templating of metal complexes by mesoporous honeycomb films for photonic applications <u>K. Hidaka</u> , C. N. Brauer and O. Karthaus <i>Chitose Institute of Science and Technology, Japan</i>	178
P-A79	Microfluidic devices driven by light-induced dielectrophoresis <u>N. Yoshimura</u> and S. Maruo <i>Yokohama National University, Japan</i>	179
P-A80	Rapid Label-free Detection for Genetic Disease using Microbeads with QD-DNA conjugate on Microfluidic Chip <u>J. H. Yoo</u> and J. S. Kim <i>Kyungwon University, Korea</i>	180
P-A81	Sensitive Fluorescence Microscopic Imaging with Plasmonic Substrate <u>K. Tawa</u> , XQ. Cui, K. Kintaka and J. Nishii <i>AIST, Japan</i>	181
P-A82	Flexible two-dimensional photonic crystal film using nanoimprint lithography for biosensing application <u>T. Endo</u> , S. Ozawa, N. Okuda, Y. Yanagida, S. Tanaka and T. Hatsuzawa <i>Tokyo Institute of Technology, Japan</i>	182
P-A83	Structural and Optical Characterization of Plasmonic Nanostructures for Enhanced IR Spectroscopy <u>D. Enders</u> , O. Saito, T. Nagao, G. Han and A. Pucci <i>National Institute for Materials Science, Japan</i>	183
P-A84	SERS-based pH sensor using folic acid functionalized silver nanoparticles <u>Jing Yang</u> , Zhuyuan Wang, Chunyuan Song, Ruohu Zhang and Yiping Cui <i>Southeast University, China</i>	184
*		
P-A86	Au Double Nanopillars with Nanogap for Plasmonic Sensor <u>W. Kubo</u> and S. Fujikawa <i>RIKEN, Japan</i>	185
P-A87	Detection of Catecholamines on Electropolymerized Polyamino-benzylamine Thin Films by Electrochemical-Surface Plasmon Resonance Spectroscopy <u>A. Baba</u> , T. Mannen, H. Sato, Y. Ohdaira, K. Shinbo, K. Kato, F. Kaneko, N. Fukuda and H. Ushijima <i>Niigata University, Japan</i>	186
P-A88	Intracellular Dual-mode Imaging Target Based on Polyelectrolyte Coated Gold Nanorods <u>Shenfei Zong</u> , Zhuyuan Wang, Hui Wu, Songhu Jin and Yiping Cui <i>Southeast University, China</i>	187
P-A89	Mechanochromic gas pressure sensor made of elastic colloidal photonic crystal <u>Hiroshi Fudouzi</u> and Tsutomu Sawada <i>National Institute for Materials Science, Japan</i>	188
P-A90	Silicon photonic wire Bragg reflectors for wavelength-multiplexed interferometric sensor arrays <u>R. Hainberger</u> , R. Bruck and P. Muellner <i>AIT Austrian Institute of Technology GmbH, Austria</i>	189

Quantum Nanophotonics

P-B01	Shape control of GaAs quantum dots grown by droplet epitaxy <u>M. Jo</u> , T. Mano and K. Sakoda <i>National Institute for Materials Science, Japan</i>	190
--------------	---	-----

P-B02	Stark Effect of GaAs/AlGaAs Quantum Double Rings <u>Yuanzhao Yao</u> and Kazuaki Sakoda <i>National Institute for Materials Science, Japan</i>	191
P-B03	Multimodal resonance in photonic crystal defect cavities incorporating GaAs quantum dots <u>T. Kuroda</u> , T. Mano, N. Ikeda, T. Ochiai, Y. Sugimoto, K. Sakoda and K. Asakawa <i>National Institute for Materials Science, Japan</i>	192
P-B04	Spin properties of excitonic complexes in GaAs quantum dots <u>M. Abbarchi</u> , T. Kuroda, T. Mano and K. Sakoda <i>National Institute for Materials Science, Japan</i>	193
P-B05	Fabrication and characterization of a stacked GaAs quantum dot structure for application to solar cells <u>T. Noda</u> , T. Mano, E. Martin, K. Mitsuishi and K. Sakoda <i>National Institute for Materials Science, Japan</i>	194
P-B06	Effects of antimony flux on morphology and photoluminescence spectra of GaSb quantum dots formed on GaAs by droplet epitaxy <u>T. Kawazu</u> , T. Noda, T. Mano, M. Jo and H. Sakaki <i>National Institute for Materials Science, Japan</i>	195
P-B07	Enhanced photoluminescence from 1.3 μm InAs/GaAs quantum dots by growing the initial part of capping layer at low temperature <u>T. Yang</u> , H. M. Ji, P. F. Xu, Y. X. Gu, X. G. Yang and Z. G. Wang <i>Institute of Semiconductors, CAS, China</i>	196
P-B08	1.3 μm InAs/GaAs quantum dots on silicon wafer fabricated with DVS-BCB bonding <u>M. Okano</u> , T. Amano, T. Sugaya, K. Goshima, N. Yamamoto, K. Komori and M. Mori <i>National Institute of Advanced Industrial Science and Technology, Japan</i>	197
P-B09	InAs-based high-power quantum-dot lasers with a double-bend ridge-waveguide structure <u>K. C. Kim</u> , I. K. Han, J. I. Lee, H. M. An and T. G. Kim <i>Korea Institute of Science and Technology, Korea</i>	198
P-B10	Super-fluorescence from an Ensemble of CuCl Quantum Dots under Two-Photon Excitation of Bi-excitons <u>K. Miyajima</u> , S. Saito, M. Ashida and T. Itoh <i>Osaka University, Japan</i>	199
P-B11	Single Quantum Dots on an Optical Nanofiber <u>R. R. Yalla</u> , K. P. Nayak, and K. Hakuta <i>University of Electro-Communications, Japan</i>	200
P-B12	Spontaneous Emission Spectrum of Multi-level Atom Coupled by Micro-wave Field in Photonic Crystals <u>Xiangqian Jiang</u> and Xiudong Sun <i>Harbin Institute of Technology, China</i>	201
P-B13	Simultaneous electromagnetic interaction observations between neighbouring excited molecules <u>H. Nejo</u> , K. Funaba, Y. Isozaki, H. Iwai, N.S. Venkataraman and Y. Kawazoe <i>National Institute for Materials Science, Japan</i>	202
P-B14	Photon Statistics in Enhanced Fluorescence from a Single Quantum Dot in the Vicinity of Metal Nanostructures <u>T. Tanaka</u> , S. Masuo, H. Naiki, S. Machida and A. Itaya <i>Kyoto Institute of Technology, Japan</i>	203
P-B15	Charge-sensitive tunneling diode towards single-photon detection <u>P. Vitushinskiy</u> , M. Ohmori and H. Sakaki <i>Toyota Technological Institute, Japan</i>	204
P-B16	Iso-electronic nitrogen δ-doping in GaP and single-photon emission from individual nitrogen pairs <u>Yoshiki Sakuma</u> , Michio Ikezawa, Makoto Watanabe and Yasuaki Masumoto <i>National Institute for Materials Science, Japan</i>	205
P-B17	Atomic configurations of NN centers and new infrared luminescence centers in GaP:N <u>Michio Ikezawa</u> , Masato Watanabe, Yoshiki Sakuma and Yasuaki Masumoto <i>University of Tsukuba, Japan</i>	206
P-B18	Plasmonic periodic structures for enhancement of the excitation and recombination processes in semiconductor quantum wells <u>V. I. Belotelov</u> , A. A. Toropov, I. A. Akimov, D. R. Yakovlev, M. Bayer and A. K. Zvezdin <i>M.V. Lomonosov Moscow State University, Russia</i>	207
P-B19	Reduction of electric-field-dependent broadening of photoluminescence linewidth with electron density <u>M. Yamaguchi</u> , S. Nomura, H. Tamura and T. Akazaki <i>NTT Basic Research Laboratories, Japan</i>	208

P-B20	Shortening of carrier lifetime and its effect on electron spin relaxation time in GaAs/AlGaAs (110) multiple quantum wells <i>K. Ikeda, Y. Nishizaki, N. Yokota, K. Ohnishi, S. Koh and H. Kawaguchi Nara Institute of Science and Technology, Japan</i>	209
P-B21	Kinetic Monte Carlo simulation of the flux dependence of semiconductor quantum dot growth <i>Chang Zhao, Man Zhao, Yi Wang, Ai Jun Lv and Guang Ming Wu Beijing Institute of Petrochemical and Technology, China</i>	210
P-B22	Modelling of dual-color quantum cascade detector with two independent output current paths <i>A. Rostami, R. Oliaee, H. Rasooli Saghai and H. Baghban University of Tabriz, Iran</i>	211
P-B23	Quantum-Dot doped microring resonators for nonlinear all-optical switching <i>A. Rostami, A. Khalafi, H. Baghban and H. Rasooli Saghai University of Tabriz, Iran</i>	212
P-B24	Ultra-high Quality Factor Microcavity Based on Quasicrystals <i>Ali Rostami, Samiye Matloub and Ali Haddadpour University of Tabriz, Iran</i>	213

Nanofiber / Photonic Crystal / Nanowire Waveguide

P-B25	Simultaneous bend insensitivity and high current sensitivity in the specialty single mode optical fiber at 633 nm <i>Pramod R. Watekar, Seongmin Ju, Su-Ah Kim, Seongmook Jeong, Youngwoong Kim and Won –Taek Han Gwangju Institute of Science and Technology, Korea</i>	214
P-B26	Photonic properties of Ti doped optical fiber <i>Youngwoong Kim, Seongmin Ju, Seongmook Jeong and Won-Taek Han Gwangju Institute of Science and Technology, Korea</i>	215
P-B27	Generation of cylindrical polarization with concentric metallic rings fabricated on optical fiber end <i>Wei Han, Weibin Chen, Don C. Abeysinghe, Robert L. Nelson and Qiwen Zhan University of Dayton, USA</i>	216
P-B28	Finite-difference analysis of Chiral Photonic Crystal Fibers <i>Junjing Li, Qiyao Su and Lei Jin Harbin Institute of Technology, China</i>	217
P-B29	Broadband coherent anti-Stokes Raman scattering microspectroscopy using the soliton pulses from a photonic crystal fiber - observation of Raman line in diamond powders - <i>K. Tada, A. Yamanaka and N. Karasawa Chitose Institute of Science and Technology, Japan</i>	218
P-B30	Slow light enhanced absorption in hollow core fibre <i>J. Grgić, S. Xiao, J. Mørk, A. P. Jauho and N. A. Mortensen Technical University of Denmark, Denmark</i>	219
P-B31	Comparison of numerical methods for computing light transmission and reflection of 2D photonic crystal <i>Gongjian Zhang and Akio Yamanaka Chitose institute of science and technology, Japan</i>	220
P-B32	Bulk-edge correspondence in photonic analog of graphene <i>T. Ochiai and M. Onoda National Institute for Materials Science, Japan</i>	221
P-B33	Electrical induced ultra-narrow quantum well filter in midway 180° phase shifted periodically poled lithium niobate with nano-scale domains <i>Jianhong Shi, Xianfeng Chen Shanghai Jiao Tong University, China</i>	222
P-B34	Nonlinear optical effects in photonic crystal slab line defect waveguide for ultrafast all-optical switch <i>H. Oda, A. Yamanaka, N. Ikeda, Y. Sugimoto and K. Asakawa Chitose Institute of Science and Technology, Japan</i>	223
P-B35	Three-dimensional Analysis of Photonic-crystal Optical Circuit by Using Eigenmode-expanded Boundary Element Method <i>J. Sugisaka, N. Yamamoto, M. Okano, K. Komori and M. Itoh University of Tsukuba, Japan</i>	224
P-B36	Design rules for two-dimensional photonic crystal nanocavities with low-refractive-index material cladding <i>T. Yamada, M. Okano, J. Sugisaka, N. Yamamoto, M. Itoh, T. Sugaya, K. Komori and M. Mori University of Tsukuba, Japan</i>	225
P-B37	Polarization-Dependent Character of 1x3 Beam Splitter Using Self-Imaging Phenomena in Air-Slab PhCW <i>M. Zhang, M. Kristensen, R. Malureanu and A. C. Krüger Aarhus University, Denmark</i>	226

P-B38	Optimizing Two-dimensional Photonic Crystal Waveguide Branches <i>Zhen Hu and Ya Yan Lu Hohai University, China</i>	227
P-B39	Wideband operation of 2D photonic crystal directional coupler with topology optimized waveguide bends <i>Y. Watanabe, N. Ikeda, Y. Takata, Y. Kitagawa, N. Ozaki, Y. Sugimoto, and K. Asakawa National Institute for Materials Science, Japan</i>	228
P-B40	Fabrication and characterization of an all-optical flip-flop based on photonic crystal waveguides and two-color quantum dots <i>N. Ozaki, Y. Takata, Y. Kitagawa, N. Ikeda, S. Nakamura, S. Ohkouchi, A. Watanabe, Y. Watanabe, Y. Sugimoto and K. Asakawa Wakayama University, Japan</i>	229
P-B41	Thermo-optic tunable silicon photonic crystal light modulator <i>Y. Cui, K. Liu, D. MacFarlane and J. Lee University of Texas at Dallas, USA</i>	230
P-B42	Two-dimensional polarization-independent photonic crystal self-collimation sensor <i>Yufei Wang, Xiyao Chen, Guozhong Lai and Wanhu Zheng Institute of Semiconductors, CAS, China</i>	231
P-B43	Design and Fabrication of sinusoidal-shaped PBS grating <i>Jijun Feng, Changhe Zhou, Hongchao Cao, and Peng Lv Shanghai Institute of Optics and Fine Mechanics, CAS, China</i>	232
P-B44	A novel method of ray-tracing based on the zero-order eigenmode wave for subwavelength structured surface <i>A. Mizutani, S. Hamataka and H. Kikuta Osaka Prefecture University, Japan</i>	233
P-B45	LCAO analysis of vertically stacked directional couplers based on amorphous silicon wire waveguides <i>M. Okano, Y. Sakakibara, T. Kamei, Y. Shoji, K. Kintaka, H. Kawashima and M. Mori National Institute of Advanced Industrial Science and Technology, Japan</i>	234
P-B46	Nonreciprocal Phase Shift of Magneto-optical Waveguide with Nano-scale Air Gap <i>R. Chen, G. Jiang, Y. Sun, X. Jiang Zhejiang University, China</i>	235

Plasmonic Nanowaveguide / THz-optical Metamaterial

P-B47	Simple coupler for the gap plasmon waveguide <i>Y. Koyama, T. Okuno, T. Okamoto and M. Haraguchi The University of Tokushima, Japan</i>	236
P-B48	Gap plasmon modes in finite and infinite gaps excited and characterized with ATR method <i>M. Flockert, Y. Nakagawa, T. Okamoto and M. Haraguchi The University of Tokushima, Japan</i>	237
P-B49	A nano surface plasmon waveguide resonator with a rectangle cavity <i>Yun Binfeng, Hu Guohua and Cui Yiping Southeast University, China</i>	238
P-B50	Characteristics of plasmonic racetrack resonators <i>H. Okamoto, K. Yamaguchi, M. Haraguchi and T. Okamoto Anan National College of Technology, Japan</i>	239
P-B51	Plasmonic leak-free focusing lens with multiple rings under radially polarized illumination <i>Xiaowei Li, Qiaofeng Tan and Guofan Jin Tsinghua University, China</i>	240
P-B52	Concentration of two-dimensional optical waves using fan-shape nanoholes with azimuthal polarization excitation <i>K. Yamamoto, K. Ichishiba, J. Takahara, A. Otomo and T. Nagatsuma National Institute of Information and Communications Technology, Japan</i>	241
P-B53	Large field enhancement through permittivity-contrast in a planar MIM waveguide <i>Luojia Wang, Ying Gu, Xiaoyong Hu, and Qihuang Gong Peking University, China</i>	242
P-B54	Nanoporous Silicon Metal-Semiconductor-Metal Photodetector <i>N. Atiwongsangthong, S. Niemcharoen and W. Titiroongruang King Mongkut's Institute of Technology Ladkrabang, Thailand</i>	243
P-B55	Surface Plasmon Dispersion in Dielectric-Metal-Dielectric structures with a Pattern on Top <i>P. Mandal, Amandev Singh, A. S. Vengurlekar and Achanta Venu Gopal Tata Institute of Fundamental Research, India</i>	244

P-B56	Anisotropic Propagation of Surface Plasmon Polaritons Caused by Organic Nanowire Layers <u>Y. Takeichi</u> , M. Fujii and S. Hayashi <i>Kobe University, Japan</i>	245
P-B57	Design of Structure for Coupling Whispering Gallery Mode with Surface Plasmon <u>K. Yamaguchi</u> , M. Fujii and M. Fukuda <i>Toyohashi University of Technology, Japan</i>	246
P-B58	Experimental research on a micron-focusing plasmonic device <u>Fenghuan Hao</u> , Rui Wang, Jia Wang <i>Tsinghua University, China</i>	247
**		
P-B60	Beam interactions with subwavelength apertures and arrays <u>A. Roberts</u> , M. Milicevic, L. Lin and X.-M. Goh <i>The University of Melbourne, Australia</i>	248
P-B61	Optical Properties of RGB Color Filter Comprising Aluminum Film with Surface Plasmon Enhanced Transmission through Sub-Wavelength Hole-Arrays <u>D. Inoue</u> , T. Nomura, A. Miura, H. Fujikawa, K. Sato, N. Ikeda, D. Tsuya, Y. Sugimoto, Y. Koide, and K. Asakawa <i>Toyota Central R&D Labs. Inc., Japan</i>	249
P-B62	Blazed metallic gratings for unidirectional excitation of surface plasmon polaritons at normal incidence <u>Benfeng Bai</u> <i>Tsinghua University, China</i>	250
P-B63	Light and dark resonances in stacked complementary plasmonic crystal slabs <u>Masanobu Iwanaga</u> <i>National Institute for Materials Science, Japan</i>	251
P-B64	Electromagnetic Energy Vortex of Sub-wavelength Plasmonic Taiji Mark <u>Wei Ting Chen</u> , Pin Chieh Wu, Chen Jung Chen, Yuan-Fong Chau, Chieh-Hsiung Kuan and Din Ping Tsai <i>National Taiwan University, Taiwan</i>	252
P-B65	Design of planar prism with graded negative index material for SWIR range using metal-dielectric composite structure <u>T. Nomura</u> , D. Inoue, A. Miura, H. Fujikawa, K. Sato, N. Ikeda, D. Tsuya, Y. Sugimoto, Y. Koide and K. Asakawa <i>Toyota Central R&D Labs. Inc., Japan</i>	253
P-B66	Wavelength division multiplexing based on metallic nanoparticle arrays <u>Jia Li</u> , Xiaoyong Hu, Ying Gu, and Qihuang Gong <i>Peking University, China</i>	254
P-B67	Diffraction Characteristic of Different Surrounding based One-dimensional Metallic Subwavelength Gratings <u>H. Z. Xu</u> , J. Wu and J. T. Lin <i>Beijing University of Posts and Telecommunications, China</i>	255
P-B68	Surface Plasmon Enhanced Photoluminescence on Biharmonic Gratings Structure <u>Y. Fujiwara</u> , M. Ojima, K. Murata, Y. Ogawa, H. Kubo, H. Yoshida, A. Fujii and M. Ozaki <i>Osaka University, Japan</i>	256
P-B69	High-performance terahertz polarizer in 0.1–3.5 THz Range <u>Z.C. Chen</u> , M.H. Hong, C.S. Lim, L.P. Shi and T.C. Chong <i>National University of Singapore, Singapore</i>	257
P-B70	Planar and three-dimensional metamaterials in the terahertz region <u>K. Takano</u> , T. Kawabata, M. Miyamaru, S. Kuboda, M. W. Takeda and M. Hangyo <i>Osaka University, Japan</i>	258
P-B71	Tunable response of terahertz metamaterials at superconducting temperatures <u>Ranjan Singh</u> , Zhen Tian, Jianguang Han, Carsten Rockstuhl, Jianqiang Gu and Weili Zhang <i>Oklahoma State University, USA</i>	259

Solar Cell

P-B72	Metal nanoparticles in an amorphous Si solar cell for surface plasmon-induced scattering and hence absorption enhancement <u>Jyh-Yang Wang</u> , Fu-Ji Tsai, Jeng-Jie Huang, Yean-Woei Kiang and C. C. Yang <i>National Taiwan University, Taiwan</i>	260
P-B73	Quantitative phase analysis of Cu(In,Ga)Se ₂ thin film by Rietveld analysis <u>T. Shimizu</u> , T. Sakurai, M.M. Islam, A. Yamada, S. Ishizuka, K. Matsubara, S. Niki and K. Akimoto <i>University of Tsukuba, Japan</i>	261
P-B74	Structural and electrical properties of lead phthalocyanine based solar cells formed on organic buffer layer <u>Daiki Kishida</u> , Takeaki Sakurai, Tatsuya Ohashi, Hikaru Kitazume and Katsuhiro Akimoto <i>University of Tsukuba, Japan</i>	262

P-B75	Effect of nitrogen doping on amorphous-carbon films prepared by sputtering method <u>N. Abe</u> , Y. Isomura, T. Sakurai and K. Akimoto <i>University of Tsukuba, Japan</i>	263
P-B76	Deep levels in Cu(In,Ga)Se ₂ thin film studied by photo-capacitance spectroscopy <u>N. Hiraoka</u> , T. Sakurai, M. M. Islam, H. Uehigashi, K. Taguchi, S. Ishizuka, A. Yamada, K. Matsubara, S. Niki and K. Akimoto <i>University of Tsukuba, Japan</i>	264
P-B77	Hetero-interface Properties of Novel Hybrid Solar Cells consisting of Transparent Conductive Polymers and III-Nitride Semiconductor <u>N. Matsuki</u> , Y. Nakano, Y. Irokawa and M. Sumiya <i>Pohang University of Science and Technology, Korea</i>	265
P-B78	Synthesis and Characterization of Chalcopyrite Thin Films Grown by a Non-vacuum Precursor Coating <u>D. Lee</u> , and K. Yong <i>University of Tsukuba, Japan</i>	266
P-B79	Dependence of Device Characteristics of Bulk-Heterojunction Organic Thin-Film Solar Cells on Concentration of Glycerol and Sorbitol in PEDOT:PSS Solutions for Fabricating Buffer Layers <u>Y. Yamaki</u> , K. Marumoto, T. Fujimori and T. Mori <i>University of Tsukuba, Japan</i>	267
P-B80	Light-Induced Electron Spin Resonance of Bulk-Heterojunction Organic Thin-Film Solar Cells <u>T. Hori</u> , K. Marumoto, M. Kijima, A. Kosuga and T. Mori <i>University of Tsukuba, Japan</i>	268
P-B81	Mechanism for enhanced efficiency of bulk-heterojunction organic thin-film solar cells by inserting metal-nanoparticles layers <u>A. Kosuga</u> , K. Marumoto, M. Kijima and T. Mori <i>University of Tsukuba, Japan</i>	269
P-B82	Reduction of residual carrier concentrations in undoped β-FeSi ₂ films by atomic hydrogen-assisted molecular beam epitaxy <u>M. Suzuno</u> , K. Akutsu, H. Kawakami and T. Suemasu <i>University of Tsukuba, Japan</i>	270
P-B83	Rutile-anatase TiO ₂ Photoanodes for Dye-sensitized Solar Cells <u>W. Q. Peng</u> , M. Yanagida and L. Y. Han <i>National Institute for Materials Science, Japan</i>	271
P-B84	I-V curve analysis based on the equivalent circuit model in dye-sensitized solar cell <u>Norifusa Satoh</u> , Jinhua Cai, Masatoshi Yanagida and Liyuan Han <i>National Institute for Materials Science, Japan</i>	272
P-B85	Material properties controlling photo-electrochemical reaction rate on dye-sensitized solar cells <u>J. Kawakita</u> <i>National Institute for Materials Science, Japan</i>	273
P-B86	Electrospinning naturally pigments for application of dye-sensitized solar cell <u>Po Te Lee</u> , Wei Tang Chiang, Yao Nan Lin, Ray Quen Hsu and Kai Ming Chang <i>National Chiao Tung University, Taiwan</i>	274
P-B87	Temperature-dependent rapid electrochemical synthesis of debris free TiO ₂ nanotubes and their application in DSSCs <u>Jia Lin</u> and Xianfeng Chen <i>Shanghai Jiao Tong University, China</i>	275
P-B88	Light Trapping Technique for Dye Sensitized Solar Cell <u>L.Chen</u> , M. Alkaisi and M. Liao <i>University of Canterbury, New Zealand</i>	276
P-B89	Study on the effect of using electrospinning on flexible dye-sensitized solar cells on conversion efficiency <u>Wei Tang Chiang</u> , Po Te Lee, Li Chun Chen, Chien-Huang Tsai, Chih Ming Lin and Ray Quen Hsu <i>National Chiao Tung University, Taiwan</i>	277
P-B90	Photoelectrochemical response of p- and n-type polymer semiconductor electrodes <u>K. Saito</u> , J. Kuwabara and T. Kanbara <i>University of Tsukuba, Japan</i>	278
